

Eridanus kitchen sinks are meticulously handcrafted with fine fireclay or ceramic and have undergone strict quality inspections. With proper care and cleaning measures, Eridanus sinks will keep in new condition and function well for an extended period of time.

### General Cleaning

- It's recommended to clean Eridanus sinks on a regular basis to avoid the build-up of soap or mineral deposits.
- When cleaning, use a non-abrasive cleaner and a soft cloth to rinse the sink thoroughly and wipe it dry to eliminate water spots, as allowing water or cleaners to evaporate will have a negative effect on the appearance of the sink.

#### Do's

- ✓ Wipe the sink dry using a soft cloth after each use.
- ✓ Scrape off any heavy grime with a plastic spatula.
- ✓ Use baking soda or mild detergent to clean off heavy stains.
- ✓ Test the cleaning solution on an inconspicuous area before applying it to the entire surface.
- ✓ Always use a bottom grid to protect your sink.

\* All Eridanus kitchen sinks come with customized bottom grids.

Bottom Grid

Mild Detergent

Plastic Scraper

#### Don'ts

- ✗ Avoid storing open containers of household cleaners and chemicals containing chlorides such as bleach, acid, drain cleaners, or toilet bowl cleaner beneath the sink.
- ✗ Avoid using harsh, abrasive cleaners or chemicals as they will potentially scratch the surface.
- ✗ Avoid direct contact with sharp and metallic objects by using protective plastic bowls, rinse baskets, and sink grids with non-abrasive bases.
- ✗ Never use steel wool, cleaning pads, or any other form of abrasive cleaning materials to clean the sink as this may dull and damage the surface of the sink.
- ✗ Do not set hot pans or other hot items directly into the sink until they cool down.
- ✗ Do not leave any form of standing water in the sink, especially if the water contains anything that could stain the sink.
