

Van Zyverden's
GIANT CANNAS WORLD'S TALLEST CANNA MUSIFOLIA

Cannas are among the most colorful summer bulbs - as flamboyant as their tropical American ancestry - with ruffled spikes tapering to refined buds boasting immense, paddle shaped leaves. Their great reedy canes and palmy foliage make for large magnificent plants.

*Exotic tropical foliage
and color*

*Can be grown
in large containers*

Deer resistant

About This Variety: Canna Musifolia is not really known for its blooms, but more so for its giant tropical textured banana sized leaves. The blooms however are a reddish coral in color. Its exotic foliage creates a stunning background with dramatic deciduous seasonal height. The ribs and edges of the leaves are trimmed in bronze.

Growing Instructions: Where not hardy, plant outdoors in early summer 2 inches deep, setting the rhizome in the hole with 'eyes' (shoots) up. Cannas do best with a good supply of water. In fall, roots can be dug up and stored in a frost free place, or in milder climates leave them in the ground and cover with mulch.

Care Tip: Needs a sheltered, warm site and plenty of watering. Leave to die back on its own.

Exposure: Sun to partial shade

Height: Grows 72-96" tall

Spacing: Plant- 18-24" apart, 2-4" deep

Hardy in: USDA zones 8-11

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
