Dear Client,

Thank you for shopping from our store.

So that you can enjoy your new product for a long time, we have put together some maintenance tips for you here:

1. Stains (eg from food, wine, sugary drinks, etc.) should be removed as quickly as possible.
2. A damp cloth or sponge or, if necessary, a soft brush and mild, lukewarm soapy water is sufficient for the cleaning. After cleaning, wipe dry with a soft cloth.
3. Never use cleaning products that contain chlorine or acid, bleach or solvents.
4. A pressure washer is also not suitable.
5. Solar radiation can develop strong heat through glasses (magnifying effect), which can cause discoloration and burn marks on the surfaces. Therefore, you should always use coasters or a tablecloth for your glasses outside.
6. With the exception of granite and ceramic, the surfaces are not heat resistant. Pots, pans, cooking utensils grill, candles, etc. should never be laid without bottoms.
7. When using table grills, remember that splashes of grease or sparks can cause unattractive stains and burns. This also applies to cigarettes / cigars: please always use an ashtray.
8. The surface is not scratch resistant, do not use sharp objects on it.

Thank you.

Best wishes.
