1 Place uprights against located stud on wall and mark location for holes. Ensure uprights are horizontally aligned. Drill pilot holes. Then secure uprights to wall using bolts provided. Use connecting spacer to securely attach second upright. (Fig. 1).

IMPORTANT SAFETY NOTE
Beware of drilling into electrical wire or pipes within wall!

2 Position arms as desired. (Arms can be positioned in 2" height intervals for maximum storage capacity). Secure with pin and spring clip. (Fig. 2).

WARNING

Do not allow children to play or hang from Rack
Maximum weight on properly installed rack 800 lbs (362 kg)
total 160 lbs (72.5 kg) per tier
