

Airfree® has already won
over countless families
in over 45 countries

Tested and approved by the best institutes worldwide, **Airfree®** eliminates any air-borne microorganisms through **exclusive technology**, without either damaging the environment or causing any noise pollution at all.

The **Airfree®** technology is the only proven means of reducing ozone. Furthermore, it is highly economic requiring neither maintenance nor filter-changing and uses less energy than a standard 60 watt bulb.

Patented and environmentally friendly technology

Requires no maintenance

Totally silent

Low energy consumption

Small and portable

Night light

Award-winning design

2-year warranty

Releases neither ozone nor ions

Model	Capacity	Consumption	Weight	Anti-stress light
Onix 3000	650 sq ft	52 W	3.3 lb	Yes

Model	Capacity	Consumption	Weight	Anti-stress light
P 2000	550 sq ft	48 W	3.2 lb	Yes

Model	Capacity	Consumption	Weight	Anti-stress light
P 1000	450 sq ft	45 W	3.1 lb	Yes

Standards identical to all models: Voltage: 110-127 V
Size (Diameter x Height): 8.4 x 10.4 in
Total absence of noise in all Airfree® models

The natural solution
for **asthma, allergies,**
mold and contaminated air

The problem comes in the air that you breathe, even at home!

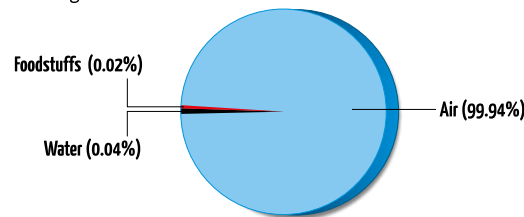

Approximately 90% of our time is spent in internal environments where air contamination can reach as high as 100 times the level found in streets.

The air in our homes is replete with microorganisms harmful to our health including the mold, dust mites, viruses and bacteria responsible for a series of diseases and respiratory allergies.

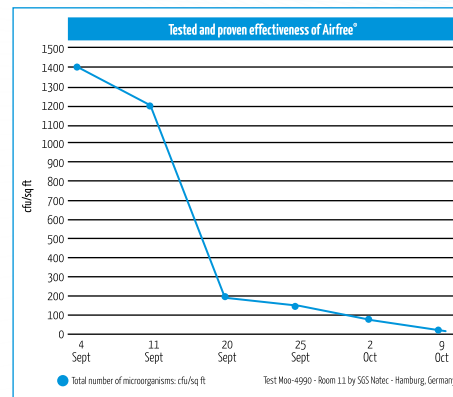

Through exclusive technology, **Airfree®** naturally eliminates up to 99.99% of microbiological air contamination and thus guaranteeing you far better quality air.

Airfree® improves your health and clearly boosts your quality of life

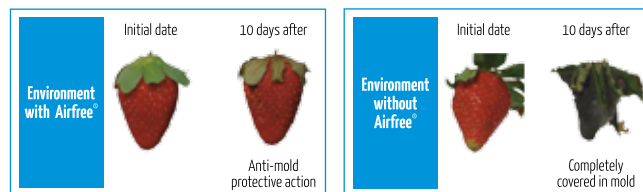

We make sure we intake only filtered water and food meeting the highest quality standards. Why, therefore, do we not similarly pay attention to the air that we breathe? Of everything that we ingest throughout our days, 99.94% is air. **Airfree®** allows you to choose to breathe better at home just as you also make choices about what you eat and drink. Using **Airfree®** is no luxury but rather an essential good.

High performance. Eliminating up to 99.99% of air impurities

Airfree® avoids the growth of mold

Airfree® protects everything and everyone

Allergy and asthma sufferers

Destroys the allergenic causes of the main respiratory diseases and allergies such as asthma, rhinitis and bronchitis.

Toddlers and mothers-to-be

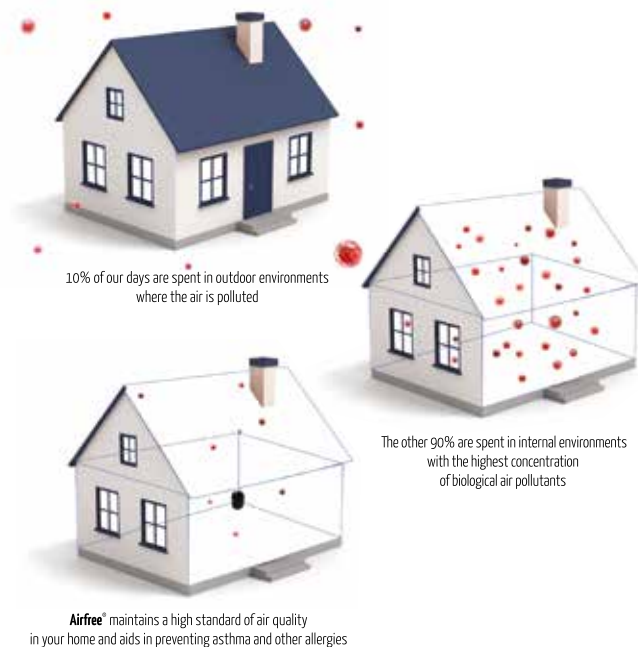

Reduces the exposure of babies to allergens thereby contributing towards the prevention of respiratory diseases such as asthma.

Homes with mold

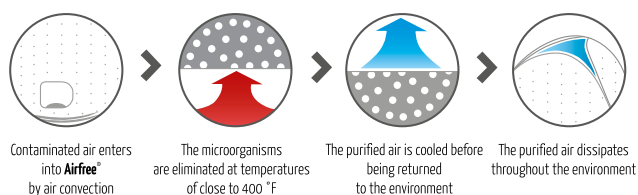

Prevents the incidence of must and mold in homes located in humid environments and with low levels of direct sunshine.

The Elderly

Guarantees a healthier and safer internal environment for more elderly citizens vulnerable to infections and allergies.

How does Airfree® purify the air?

Dust mites
Ozone
Bacteria
Viruses
Mold
Pollen
Organic odors
