HOW TO CARE FOR YOUR NEW GRASS

El fertilizante Scotts® Turf Builder® Starter® Food for New Grass

puede aplicarse inmediatamente antes o después de sembrar el césped nuevo.

Riegue a diario o según sea necesario para mantener la superficie del suelo húmeda hasta que el césped nuevo alcance por lo menos

Watering

After you've planted your new grass, continue to water at least twice a day (or more frequently if the weather is hot), until it has been mowed 1-2 times. Once your new grass is established, you can go back to a normal watering routine.

Treating Weeds

Wait until you've mowed your new grass at least 4 times before treating the new grass with a crabgrass preventer or other weed control product. Always read the product label for specific information related to the weed control product you are using.

Feeding

Feeding is important for all lawns, but it's especially important for new grass plants. To leaving is important or an arrans, out it expectedly important on the vigas bears, see your new grass growing and maintain a thick, green appearance, provide a follow-up feeding in 2-4 weeks with Scotts* Turf Builder* Starter* Food for New Grass. If you line in a mean where Phosphorous applications are limited, feed with Scotts* Turf Builder* Lawn Food instead, Once your new grass is established, continue with regular feedings every 6-8 weeks.

Florida applications: Maximum of 4 annual feedings with the exception of bahiagras and centipedegrass (2 feedings in the north and 3 feedings in the central and south).

Treating Bugs

Most bug control products can be used any time on newly planted grass. Always read the product label for specific information related to the pest control product you

Mowing

If you've seeded bare spots or a whole lawn, wait to mow the area until the new grass is at least 3 inches tall. If you've seeded over your existing lawn, you can mow as needed, but try to cut back the frequency to limit traffic on the new seedlings.

Water Smart®

Well fed lawns are more efficient at using available water. Feeding with Scotts® Lawn Food helps grow a thick lawn with more roots to better absorb water and nutrients than an unfed lawn. This helps protect your lawn against heat, drought and other stresses.

& Your Environment

A Green Lawn Is a Good Lawn - A healthy lawn cleans the air, produces oxygen and prevents runoff and soil erosion. You can make a difference - Help keep our water resources clean. Apply this product only to your lawn, and sweep any product that lands in the driveway, sidewalk or street back on to your lawn.

We care - Scotts® products are designed with care to grow a thicker, greener lawn.
