

Instruction on how to set-up the Collapsible Rain Barrel

(Approximate Assembly Time: 5 minutes)

WARNING:

The barrel is "sit still" design, any inappropriate pull and drag will cause product damage.

Please place the barrel on even ground;

Do not move the barrel while it is full of water;

Keep children out while in use!

Package included:

- 1.Green Rain Barrel*1
- 2.Poles*6 (or 7 Poles for 100 Gallon Barrel)
- 3.Bottom Drain Spigot*1
- 4.Top Overflow Valve*1
- 5.(Extra White Spigot for 100 Gallon Barrel ONLY)

Step 1-To Assemble Bottom Drain Spigot

Remove the plastic cap and ONE rubber washer

Insert the spigot into the BOTTOM hole of the rain barrel.
Reattach the removed rubber washer inside the barrel before attaching the plastic cap back.
(Make sure one rubber washer is outside of the rain barrel, the other one is inside)
Adjust the spigot to a right direction.

Step 2-Assemble Top Overflow Valve

Remove plastic cap and ONE rubber washer

Follow step 1, insert the valve into the TOP hole of the rain barrel.
(Make sure one rubber washer is outside of the rain barrel, the other one is inside)

Step 3-(Assemble the Extra White Spigot for 100 Gallon Barrel ONLY)

Follow Step 1 or Step 2 to insert the white spigot into the MIDDLE hole of the rain barrel.
(Make sure one rubber washer is outside of the rain barrel, the other one is inside)
Adjust the spigot to a right direction as shown on following picture.

Step 4-Assemble the Rain Barrel Frame

Insert all the poles into the slot openings on the bottom of the rain barrel.
