

CW-5202 Industrial Water Chiller

VEVOR

ENHANCE LASER PRECISION WITH OPTIMAL COOLING

Perfect for CO₂ engraving machines with laser tubes rated up to 180W

600W
Power

18L/min
Max. Flow

7L Water
Tank Capacity

Note: 550W rated power for European and Australian standards

Our CW-5202 industrial chiller features a built-in compressor for machinery requiring compact water cooling solutions. With a 7L water tank and built-in cooling fan for superior ventilation, it is ideal for 2 sets of CO₂ laser engraving machines with laser tubes rated up to 180W.

Includes 2 sets of cool water inlet and outlet

DELIVER STABLE AND CONTINUOUS WATER FLOW

Built-in powerful water pump for enhanced flow speed and rapid heat dissipation from laser tubes

48W
Pump Power

Cools two units simultaneously.

Equipped with a powerful water pump, our industrial chiller guarantees that water flows at the perfect speed to swiftly dissipate heat from your laser tubes, resulting in highly efficient cooling performance.

VISIBLE WATER LEVEL DESIGN

Timely cold water refills to ensure optimal cooling performance

Note: Recommend using distilled water to avoid algae growth in the tank.

Our industrial chiller is equipped with visual water level, allowing you to directly monitor the water level in the tank, making it effortless to determine when a water refill is needed. It maintains optimal cooling efficiency and avoiding any heat dissipation issues caused by low water levels.

TRIPLE SECURITY PROTECTION

Ensure stable operation of the chiller

- 01 Overcurrent Protection**
Avoid circuit overloads and short circuits
- 02 Flow Alarm**
Timely feedback of abnormal water flow conditions
- 03 Overtemperature Alarm**
Protect equipment from damage due to overheating

The overcurrent protection automatically cuts off the power if the current exceeds secure thresholds. The flow alarm actively monitors the water flow to remain within the preset normal range. The overtemperature alarm continuously tracks the temperature, avoiding potential damage from overheating.

KEEP WATER PIPES FROM FALLING OFF

Include hose clamps and Teflon tape for superior seal and strengthened connection

Sealing hoops×4

Teflon tape x1

Our water chiller comes with 4 sealing hoops and a Teflon tape, designed to reinforce the seals at connection points, ensuring stability and give you an extra layer of security, keeping your setup leak-free and functioning flawlessly.

VEVOR

18.5 inch / 470 mm
22.8 inch / 580 mm
11.4 inch / 290 mm

Item Model Number:	CW5202
Rated Power:	600W (US)/550W (European/Australian)
Water Tank Capacity:	7 L
Maximum Flow Rate:	18 L/min
Rated Cooling Capacity:	1700W (US)/1450W (European/Australian)
Cold Water Inlet/Outlet Port Diameter:	φ 0.4 in/10 mm
Main Material:	Carbon Steel, Copper
Refrigerant:	R134a
Number of Cooling Equipment:	2
Product Net Weight:	60 lbs (US)/25 kg (European/Australian)

We continue to be committed to provide you with cost-effective tools. "Save Half" or any other similar expressions used by us only represents an estimate of savings you might benefit from buying certain tools with us compared to the major top brands and does not necessarily mean to cover all categories of tools offered by us. You are kindly reminded to verify carefully when you are placing an order with us if you are actually saving half in comparison with the top major brands.

Specification

Item Model Number	CW5202	Rated Power	600W
Water Tank Capacity	7L	Maximum Flow Rate	18 L/min
Rated Cooling Capacity	1700W	Cold Water Inlet/Outlet Port Diameter	φ 0.4 in/10 mm
Main Material	Carbon Steel, Copper	Number of Cooling Equipment	2
Product Net Weight	60 lbs
