HOW TO USE YOUR SOLO STOVE SHELTER

Step 1

Open the bag and turn Shelter upside down. Open the support stay, fanning it out into the shape of an 'X'.

Step 2

Insert the rounded ends of the support stay into the 4 corresponding loops on the underside of Shelter. Fasten the center of the support stay securely in place.

Step 3

Flip Shelter back to its upright position and place it on top of your fire pit.

Now enjoy the all-weather security of Shelter to protect your good moments. The UV coated acrylic won't fade on summer days, and Shelter is PVC backed to prevent moisture in every season.

TIPS AND GOOD THINGS TO KNOW

- Support stays are slightly curved, and should be positioned to create a dome shape over your fire pit.
- Shelter can be more rigid in cooler temperatures. If it's a tight fit, let Shelter warm to room temperature before placing it over your fire pit.
- Shelter is not high heat-resistant. Allow your fire pit to cool completely before covering with Shelter to avoid damage.
