

### Use and Care Manual

These panels were produced in 4x8 form in accordance with ANSI/HPVA standards. While we do our best to produce the best product possible, this panel is 100% natural wood and there must be some allowance for defects. We want to be good stewards of this natural resource and we also want to maintain a reasonable cost for our customers.

We use a K grade core in this product.

ANSI/HPVA Standards for Core Grade K

<u>Defect</u>	<u>Allowable Dimensions</u>
Knotholes and other round openings (Max Diameter)	3/8"
Core Gap/Split (Max Width)	1/4"

### Warp

This panel is 100% wood and movement/warp can occur in response to changes in environmental conditions, even after shipment. We cannot guarantee flatness. For best results, store flat and allow panels to acclimate to interior climate before use to minimize warping.

### Back Grades

According to ANSI/HPVA standard, the back grades on our panels do allow for more color variation, or sapwood. Some darker species such as cherry and walnut, can have these lighter characteristics on the back grades.

We use a 1 grade back for this product.

ANSI/HPVA Standards for Back Grade 1

<u>Defect</u>	<u>Allowable</u>
Sapwood	Yes
Discoloration & Stain	Yes

\*Please see Grading Guide for more detailed information
