

PEQUA®

PEQUA MAINLINE CLEANER

DIRECTIONS:

FOR A SLOW MOVING MAINLINE: Pour the entire contents of the container into the main line that leads from the house to the sewer or septic system. Use one gallon of Mainline Cleaner for every twenty feet (20') of main line. Use no water for at least three hours or overnight, then flush with warm or hot water. Repeat treatment if necessary.

FOR TOTALLY BLOCKED MAINLINE: First unblock the main line. Then follow with directions for slow moving main line.
