

Usage Instructions for Car Window Sun Shade

1. Suitable Scenarios

Ideal for sedans, trucks, SUVs, hatchbacks, jeeps, minivans, and full-size cars.

Use it on side entryway windows to protect passengers—especially babies—from sun glare, heat, and harmful UV rays.

2. Installation

- Ensure the window glass is clean and dry.
- Unroll the shade to your desired length.
- Press all 6 suction cups firmly against the window; hold each for 2–3 seconds to secure.
- Close the window completely after installation for stability.

3. Adjustment

The shade can be adjusted to fit different window sizes by rolling it up or down as needed.

4. Retraction

Press the release button to retract the shade smoothly for storage when not in use.

5. Safety Note

The shade is made of non-toxic PVC material, safe for children. Avoid forcing the retraction mechanism to prevent damage.

6. Maintenance

Clean the shade with a damp cloth occasionally. Check suction cups regularly; replace if they lose stickiness.
