STORAGE, CARE AND HANDLING INSTRUCTIONS:

- ▶ When doors are received they must be inspected immediately for quality, including correct size, machining, species of veneer and finish (if factory finished).
- ▶ Buildings where humidity and temperature are controlled provide the best storage facilities (recommended conditions 25%-55%RH and 50°F to 90°F [10°C - 32°C])
- ▶ Warping and oil-canning may occur, depending on the season and relative humidity, until the doors become conditioned to the humidity and temperature of the building.
- ▶ Deliver doors to the site after plaster, drywall or cement is dry to avoid excess moisture.
- ▶ Keep the doors away from direct sunlight and sources of extreme heat, cold or humidity.
- ▶ When storing door slabs, keep the doors stacked horizontal and fully supported on a level surface, do not lean the doors vertically against a wall or other structure. When stacking doors, keep the top door covered at all times with a cover sheet, plywood or cardboard.

FINISHING INSTRUCTIONS (not applicable to Masonite's pre-finished doors):

- ▶ Test several doors for compatibility with your finishing system. If you encounter a problem, DO NOT PROCEED but contact your paint manufacturer for assistance. Masonite is not responsible for compatibility issues.
- ▶ Within 7 days of delivery to a job site, all six (6) edges (top, bottom, sides) and other unfinished surfaces must be sealed with at least two (2) coats of paint, varnish or lacquer, if local code permits, to prevent warping, twisting and checking. Follow the coating manufacturer's instructions carefully, including guidelines on reduction of water-based paints. Primer does not function as a sealer or moisture barrier.
