MANUAL

INSTRUCTION FOR FINISH CARE & CLEANING & MAINTENANCE OF DESIGN LIVING LIGHTING FIXTURES

Proper care and maintenance of lighting fixtures is very important. Simple steps can be taken to maintain the finish and electrical integrity of you're recently purchased Design Living lighting fixtures.

Below are some hints for preserving your lighting fixture.

Finish Care

Initial care for finishes requires only periodic cleaning with a soft cloth, dampened with water. A mild non-abrasive soap may be used along with a soft cloth and water if the fixture is very dirty. Particular care should be taken to avoid abrasive materials and strong cleaning agents as they often destroy the protective coatings and subject the finish to rapid oxidation and/or discoloration.

Fixture Maintenance

Always use recommended lamp wattages on fixtures. Using a lamp with a higher wattage than recommended can cause overheating in fixtures. This will reduce lamp life.

Glass Maintenance

Glass and crystal should be cleaned with water or very mild soap. Glass and crystal should be dried with a soft cloth. Glass and crystal must be removed from fixture before cleaning.
