

# It's Unboxing Time

It may not look like a mattress yet, but follow these five simple steps and watch this box transform into a bed you can't wait to sleep on.

- 1.** Pull your new mattress out of the box and admire its likeness to a tightly rolled taquito.
- 2.** Position mattress wherever you want it to decompress. We recommend a bed base, but wherever will do.
- 3.** Carefully cut outer plastic and roll mattress into place. It should start looking like a mattress now.
- 4.** Even more carefully cut inner plastic, then step back and watch your mattress grow.
- 5.** Remove plastic covering, allow your mattress to fully decompress, and sleep like a baby.

**Pro Tip:** Mattress will expand more quickly in a warm room and may take up to 48 hours to fully decompress.
