INSTALLING THE CASTERS:

NOTE: If you need to open the cabinet doors during assembly, open them slowly and do not put any weight on the open doors. This avoids damage to the cabinets hinges.

1. Using two or more people, place the cabinet upside down. Use supplied packaging material to cushion the cabinet to prevent any scratching of the painted surfaces.
2. Line up each caster with the corners of the cabinet. The holes in the base of the cabinet should align with the holes in the caster
3. Using the power drill or hand tighten the bolt with one small washer into each of the holes. There are 4 holes to attach the caster to the base of the cabinets.

Bolts should be snug. Do not over tighten or force bolts.

NOTE: This may result in damaging of the threads. 4.
Repeat steps 2-3 for the remaining legs.

5. Using two or more people, stand up the cabinet and place into desired location

REMOVING DRAWERS(OPTIONAL)

1. Pull each drawer out to full extension, simultaneously depress the left lock down and right lock up in each slider while pulling out the drawer. The drawer will slide out of the tracks ready to remove. See the diagram to note where the locks are on the drawer slides.

2. Put drawers back into base cabinet by aligning them with the ball-bearing slides drawer tracks. The drawer should slide back into place. Push the drawer fully into the cabinet, then pull it out to full extension. If the drawer does not stop at full extension, or feels loose, the drawer has not been put back into the drawer slides properly. Ensure both drawer slides attached to the drawer are running along the drawer slides attached to the frame of the cabinet.
