

Leviton Architectural Edition® Powered by JBL®

Studio Quality Sound from the Professionals

JBL studio speakers have a reputation for incorporating the most advanced audio materials, technologies, and precision engineering available. Through Leviton's longstanding partnership with JBL select products have been chosen for the Leviton Architectural Edition Powered by JBL family of speakers. Five new speaker options enhance this popular speaker line.

Product Features

- Designed to perfectly match any flat-panel TV, the Leviton Architectural Edition® Powered by JBL® Soundbar with Wireless Subwoofer and Bluetooth, part number LAESB, provides stunning, virtual surround sound from a sleek and simple package. It connects wirelessly to its compact, powerful subwoofer, and connects with a single cable to the TV.
- New Dual 5 and ¼" Two-Way In-Wall Center Channel Loudspeaker, part number LAE5I, has Nearly invisible zero-bezel paintable magnetic grilles, that seamlessly blend into wall or ceiling architecture as a low-profile installed center channel speaker or as an extreme performance left/right speaker in a no compromise home theater system.

- New Indoor/Outdoor All Weather Loudspeakers, part number LAEAW, feature weatherized housing with a sleek angled profile and are ideal for outdoor, utility, commercial, indoor pool, atrium, and other large space applications.
- New LAESW free-standing (non-installed), powered subwoofer offers the signature punch and accuracy of JBL bass with a sophisticated modern look and can be used to reinforce the performance of in-wall and in-ceiling installed speaker systems.

- New LAE5S Dual 5 and 1/2" Two-Way Shelf-Mount Center Channel Loudspeaker is a free-standing (non-installed) center channel speaker, ideal for applications where an installed speaker is not practical such as a home theater system in a large entertainment center where an in-wall speaker would be blocked or wall construction does not permit installation.
