

Use & Care Guide

Thank you for purchasing this LuxenHöme outdoor table. It has been manufactured to the highest standards of safety and quality.

Care Instructions for your Patio Table:

We recommend wiping the table with a damp paper towel or soft cloth before using it. New tables may often have residue from production.

Cleaning tips for each type of table material:

- **MgO (Magnesium Oxide) Table:** Use water and a soft washcloth.
- **Cement Table:** Use water and a soft washcloth.

Use Instructions for your Patio Table:

- Place the table on a level ground or surface. It is best on a surface with no standing water or possibility of standing water.
- It is best if the table is not left in standing water or snow for long periods of time. Standing water or snow may cause damage to the base of your table.
- During extreme winter conditions, we recommend covering your table with a waterproof tarp or moving your table to a sheltered, dry location to help prevent damage.
