

CARE TIPS AND GENERAL INFO FOR:

SEMPERVIVUM

EXPOSURE:

SHADE OR SUN

BLOOMTIME:

While Sempervum will bloom, their flowers are small and inconspicuous. Instead plant these in rock gardens, along the edges of a bed, in a patio planter, sun or shade they will add unique succulent color and texture.

WATERING NEEDS:

MINIMAL

1x/wk the first year.
2x/mo once established.
1x/wk if grown in a decorative pot.

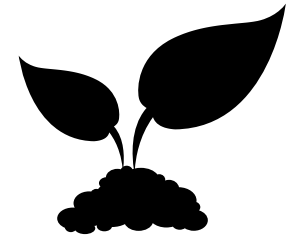

FERTILIZER:

CONTAINER DEPENDENT

In the landscape use a slow release granular fertilizer spring and fall. In a container use a water soluble type twice a month. Or none at all. Sempers are super easy to grow and require little care.

SOIL TYPE:

ANY SOIL TYPE.

Well draining is always the best choice, to avoid over watering.
