

Artificial Boxwood Hedge Panels

User Manual & Care Guide

Page 1

1. Product Overview

This package includes 12 pieces of 10×10 inch artificial boxwood hedge panels, with a total coverage area of 8.3 square feet. Each panel has a thickness of 2 inches, which gives it a realistic and dense appearance. The dense structure can effectively block the background and protect privacy. Additionally, 100 zip ties are provided as a bonus for convenient and cost-effective installation.

The 12 artificial lawn decorative panels are made of 100% new PE material, featuring no pungent odor, UV resistance, fade resistance and durability. Therefore, they can withstand various weather conditions, have a service life of several years, and are safe for the elderly, children and pets.

2. Application Scope

The lawn background wall has a wide range of uses and is an ideal choice for creating private outdoor spaces. It can beautify and transform your outdoor courtyard, birthday party, wedding, banquet, fence, indoor office, bar, living room and other places. The green plant wall decoration adds a more natural atmosphere.

3. Installation Instructions

3.1 Preparation

Take out the artificial boxwood panels, zip ties and interlocking connectors from the package. Prepare scissors or a utility knife if you need to adjust the size or shape of the panels.

3.2 Cutting (If Needed)

Measure the area to be decorated first, then cut the grid panels into the appropriate shape and size with scissors or a utility knife before assembly.

3.3 Assembly & Fixing

- Connect the panels using the interlocking connectors according to your layout requirements.
- Use the included zip ties to firmly fix the assembled panels to fences, walls or

other supports.

- The boxwood grid panels are easy to roll up, carry and hang, making them suitable for temporary decoration at various events.

4. Maintenance & Care Tips

4.1 Daily Cleaning

- For indoor use: Wipe the surface of the panels with a dry or slightly damp cloth to remove dust.
- For outdoor use: Rinse the panels directly with clean water and let them air dry naturally. Do not use a high-pressure water gun to avoid damaging the PE leaves.

4.2 Storage Precautions

- When not in use for a long time, roll up the panels and store them in a dry and ventilated place, away from direct sunlight and humid environments to prevent mold growth.
- Do not place heavy objects on the rolled panels to avoid deformation.

4.3 Important Notes

- Do not expose the panels to high-temperature sources (such as stoves, heaters) for a long time, as this may melt the PE material.
- Avoid scratching the surface of the panels with sharp objects during installation and use.
- The panels are for decorative purposes only and shall not be used as load-bearing structures.

5. After-Sales Reminder

Under normal use conditions, this product is guaranteed free from material and manufacturing defects. If you encounter quality problems, please contact the seller in a timely manner with your purchase certificate.

Word Document Formatting Guide

1. Copy all the above content into a blank Word document.
2. Page settings: Paper size A4, margins 2.54cm on all sides.
3. Font settings: Title (Arial, 14pt, Bold), Body text (Arial, 11pt, 1.5 line spacing).
4. Insert a page break after the content of Page 1 to ensure the content is divided into two pages, then save the document.
