

# Gable Mount Fan Replacement Instructions

**WARNING:** Please take the time to read through the ENTIRE instructions prior to starting any work. Not following the instructions will invalidate the warranty.

## Precautions:

1. Ensure normal safety precautions are taken when using tools, ladder and walking on roofs.
2. Do not cut any structural members in the house.
3. Install only in dry weather.

## Tools Required:

- Power Drill
- Phillips Screwdriver
- Caulking Gun
- Ladder
- Electrical Tape
- 1/4" Masonry Bit (for tile roofs)

For Tile installs Only

Optional Power Cable Adapter

## Gable Fan Installation Kit:

- A. Gable Fan
- B. Solar Panel
- C. (2) L-Brackets
- D. Caulk
- E. (14) Wood Screws
- F. (4) Self-Tapping Screws (L-bracket to panel)
- G. (4) Machine Screws (for tile roofs)
- H. (4) Anchors (for tile roofs)

*NOTE: Additional power cable is available*

A.

## Installation Pointers:

When determining location of the solar panel, consider potential problems such as objects shading the unit during certain times of the day (southern exposure is recommended). To ensure proper ventilation, install the Gable Solar Fan so that it covers the entire gable opening.

**Step 1** Choose location to install the gable fan. The fan must be installed between studs in the gable area. For proper ventilation, the fan unit must cover the entire gable opening. If the gable opening is larger than the fan unit shroud, the excess opening must be blocked. **DO NOT CUT ANY WOOD FRAMING.** From inside the attic, position the gable fan (with the motor facing the attic) to the desired location and secure the shroud with the provided wood screws (E) see Figure 1.

**Step 2** Locate area to install the solar panel on the roof where it will gather the most amount of sunlight (southern exposure is recommended). Attach the L-brackets (C) to the long sides of the solar panel with the self-tapping (F) screws into the pre-drilled holes on the panel frame. Attach solar panel to roof using the provided wood screws - see Figure 2. Caulk around the wood screws to prevent leaks. **FOR TILE ROOFS:** Pre-drill hole in tile to accommodate the anchors provided (H). Tap anchors into holes and secure L-bracket using provided screws (G) - see inset.

**Step 3** Use one of the following two options for routing the power cable from the fan to the solar panel:

**OPTION 1:** Route the power cable from the fan unit through the gable vent and along the outside of the house up to the roof.

**OPTION 2:** Drill a small hole next to the solar panel on the roof. Route the power cable from the fan unit through the attic and up through the hole. Caulk around hole to prevent leaking.

**Step 4** Connect the power cable from the fan unit to the power cable from the solar panel. Connect the black wire to the black wire and the red wire to the red wire - see Figure 3. If the power cables do not reach, a power adapter cable is available. If wire connections are located outside of the attic space, wrap the connections with electrical tape to prevent water infiltration. Secure any loose wires using wire staples (not provided).

# Solar Attic Fan Limited Warranty

## W A R R A N T Y

*This Gable Solar Attic Fan  
has a 25 year warranty against manufacturers defects.*

**IMPORTANT:** Please complete and mail the registration card below as soon as your Solar Attic Fan is installed. This warranty will serve as proof of your purchase, should you misplace your original invoice.

The manufacturer warrants this product and its components to be free from defects in material and manufacturer's workmanship for a period of twenty five years from the date of installation. This warranty is subject to proper installation of the unit in accordance with the manufacturer's written installation instructions. The manufacturer will not be liable for any special, incidental or consequential damages in any way related to, or arising out of, defects in, or damage to, the Solar Attic Fan.

This warranty gives you specific legal rights, and you may have other rights which vary from state to state concerning exclusion or limitation of incidental or consequential damages.
