HOW TO USE THE BREEO BASE

HOW TO USE

Take your Breeo Base out of the box and remove it from the bag. Position it where you'd like your fire pit.

Once the Base is situated, place your fire pit on the Base with the legs aligned with the corners of the base.

Once the fire pit is placed on the Base, do not slide the Base across the surface as it may scratch your surface. Also, sliding the fire pit on the Base should be avoided as it could scratch it.

SURFACES

Non combustible surfaces:

The Breeo Base will protect paver patios, stamped concrete, concrete, blacktop, gravel, dirt & any other non combustible surfaces from damage due to excessive heat.

Combustible surfaces:

The Breeo Base will provide adequate protection from damage due to excessive heat on wood decks, composite decks, and wood chips. ***However, due to the combustible nature of the surface, a spark screen is required at all times*** and the firewood must stay below the rim of the fire pit at all times.

Grass:

The Breeo Base can be used on grass to add extra height to your fire pit, but it ***will not*** provide adequate protection to prevent the grass from dying due to heat.

FOR YOUR SAFETY

Because the Breco Base is stainless steel, it will get hot while the fire is burning. We do not recommend touching the base as the fire burns.

When using the fire pit and Base on a combustible surface, we recommend using a spark screen and keeping the wood below the rim to ensure proper fire safety.

CARE & CLEAN

To clean the Breco Base, use a stainless steel cleaner - such as Bar Keepers Friend.
