

All-Purpose Garden Soil

Vigoro® soils and amendments are blended to grow beautiful plants. Our Vigoro® All-Purpose Garden Soil continuously feeds plants for up to 9 months. It is specially blended for all in ground flower and garden beds.

Grow beautiful vegetables, fruits, herbs and flowers.

Directions

1. Apply 2-3 in of Vigoro® All-Purpose Garden Soil to the top of the desired planting area.
2. Rototill or use a shovel to mix into the top 4-6 in of native soil. Level the soil area.
3. Plant seeds or plants according to directions.
4. Water thoroughly after planting and then daily until established.
5. Cover area with mulch when appropriate.

Fertilizing: Apply fertilizer according to package directions when plants show signs of slowed growth or foliage turns a lighter shade of green.

IMPORTANT:

We recommend wearing gardening gloves when using this product.

Be sure to mix Vigoro® All-Purpose Garden Soil with native soil as directed above to avoid creating a distinct layer between the product and native soil. This will allow roots to expand easily for more vigorous plant growth.

In the state of Washington, do not exceed 130 bags per acre per year.
