

## Installation & Assembly Instructions

**LocBin™ Bin Kits - For All BinKit Model Numbers: 021, 022, BK-210, BK-220, BK-235, 028-Y,B,BK,BR,R**

### Your new LocBin™ BinKit System

LocBins™ are the strongest, most heavy duty hanging and interlocking bins available. The first thing you will notice is that they are shipped nested together to save space during shipping. Pull/slide them apart and then stack and interlock using the top channel and you're ready to hang on the included BinClips. Like all hanging bins they will also hang on a louvered panel or Wall Mount Rail. The 021, 022, 028's, BK-210, BK-220 all use 1 BinClip per bin. The BK-235, BK-240 all use 3 BinClips per Bin.

**De-nesting LocBins™:**  
Pull top bin up and out.

### Interlocking LocBins™:

Bins are tightly held together in the bottom sliding track. There is a stop at the front of each of the bins so they do not accidentally slide apart. **For 3-235 and 3-240 bins: Flip the bins over and apply pressure to the top bins for easy de-nesting.** After de-nesting LocBins, you can interlock them by inserting the bottom track of a bin into the top track of another. Bins will lock together.

### Peace of Mind

Enjoy the unique benefits of LocBin™ as there are no concerns that your bins will fall apart and topple when stacked. Don't worry, LocBins will never fall into each other and accidentally spill contents. A stack of LocBins can be transported to your work area and set on any flat surface without concern that the bins will separate from one another, fall, or mix your items.

### Pegboard Mounting Instructions:

**1)** Insert BinClip engaging tab through hole in pegboard. Align hooks screw hole with the hole below. Secure in place using small Phillips head screw and hand-held screwdriver non-powered. Do not over tighten.

**2)** Hang your LocBins™ on the BinClips by inserting the back lip of the bin to the top of the BinClip. Enjoy your new LocBin™ BinKit system for years to come!
