

FLOATING BOX SHELF

HANGING INSTRUCTIONS

Step 1

At desired spot on your wall, using a level place inner support board on wall and make a small mark on wall and on the inner support board in line with each the screws.

*3/4" difference in height due to box wood thickness

STEP 2

Mount inner support board to the wall using a supplied #6, 3" phillips head screw.

*We recommend using a stud finder to make sure the inner support board is secured into a wall stud

STEP 3

Fit box shelf over the inner support board, push flush to the wall. Using the supplied #6 2" phillips head screw, mount box shelf to the inner support board.
