4. FIRST AID MEASURES

INHALATION	Remove to fresh air. Keep patient calm and warm. If not breathing, give mouth-to-mouth resuscitation. If unconscious, place in recovery position and seek medical attention.
EYE CONTACT	Flush continuously with fresh water for at least 15 minutes, holding the eyelids apart. Seek medical attention.
SKIN	Remove contaminated clothing. Wash skin thoroughly with soap and water. Do NOT use solvents or thinner. Remove contaminated clothing or shoes. Obtain medical attention if irritation persists.
INGESTION	If accidentally swallowed, obtain immediate medical attention. Keep at rest. Do NOT induce vomiting. If possible, do not leave individual unattended.

5. FIRE FIGHTING MEASURES

FLASH POINT	18 °C
METHOD USED	CC
LOWER EXPLOSION LIMIT	1.4 Vol. %
UPPER EXPLOSION LIMIT	11.5 Vol. %
EXTINGUISHING MEDIA	Use alcohol-resistant foam, carbon dioxide (CO ₂) or dry powder fire extinguisher.
UNSUITABLE MEDIA	Water spray may not be effective.
FIRE-FIGHTING EQUIPMENT	Wear full fire-fighting bunker gear and respiratory protection (SCBA).
DANGER IN CASE OF ACCIDENT	Fire will produce dense black smoke. Exposure to decomposition-products may cause danger to health. Wear appropriate equipment. Cool closed containers exposed to fire with water. If possible, remove from dangerous area. Do NOT allow runoff from water (caused from fire-fighting) to enter drains or water streams.

6. ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS	Immediately contact emergency personnel. Eliminate all sources of ignition. Use suitable protective equipment (Section 8). Use explosion-proof equipment. The very fine particles can cause fire or explosion.
CLEAN-UP MEASURES	If emergency personnel are unavailable, contain spilled liquid with non-combustible absorbent materials e.g. sand, earth, and vermiculite. Use a non-sparking or explosion proof means to transfer material to a sealed, appropriate container for disposal. Obey all local, state and federal laws regarding chemical spills. Do NOT allow entering drains or water streams.

7. HANDLING AND STORAGE

HANDLING

Vapors are heavier than air and may spread along floors. Vapors may form explosive mixtures with air. Prevent the creation of flammable or explosive concentrations of vapor in air and avoid vapor concentration higher than the occupational exposure limits.

Additionally, the product should only be used in areas from which all exposed lights and other sources of ignition have been excluded. Electrical equipment should represent the appropriate safety-standard.

Preparation may charge electro-statically: always use ground-wires when transferring from one container to another. Operators should wear antistatic footwear and clothing. The floors should be in connection with electrical ground. Only use spark-free tools.

Avoid skin and eye contact. Avoid inhalation of vapor and spray-mist. Smoking, eating and drinking should be prohibited in application-area.

STORAGE

Keep container tightly closed. Store between 15 and 30 °C in a dry and well-ventilated area away from heat, sparks and direct sunlight. Keep away from oxidizing agents, from strongly alkaline and strongly acidic materials. Empty containers may retain hazardous properties. Do not cut, puncture or weld on or near the container. Store large quantities only in buildings designed to comply with OSHA 1910.106.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS

Use exhaust ventilation to keep airborne concentrations below exposure limits

PERSONAL PROTECTIVE EQUIPMENT

EYES

Chemical splash goggles in compliance with OSHA are advised.

SKIN

Wear resistant gloves such as Buna-N (nitrile rubber). Personnel should wear antistatic clothing made of natural fiber or of high temperature resistant synthetic fiber. All parts of the body should be washed after contact.

RESPIRATORY

When respiratory protection is required, or concentrations are unknown use a NIOSH/MSHA approved air-purifying respirator equipped with organic vapor cartridges or canisters. For emergency and other conditions where exposure limit may be greatly exceeded, use an approved positive-pressure, self-contained breathing apparatus or positive-pressure airline with auxiliary self-contained air supply.

EXPOSURE GUIDLINES

See Section 2 for ingredient exposure limits.

11. TOXICOLOGICAL INFORMATION

There are no data available on the preparation itself. Exposure to component solvents vapors concentration in excess of the stated occupational exposure limit may result in adverse health effect such as mucous membrane and respiratory system irritation and adverse effect on kidney, liver and central nerve-system.

Symptoms and signs include headache; dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and absorption through the skin. The liquid splashed in the eyes may cause irritation and reversible damage.

12. ECOLOGICAL INFORMATION

There are no data available on the preparation itself.
The product should not be allowed to enter drains or watercourses.

13. DISPOSAL CONSIDERATIONS

Do not allow the product to enter drains or watercourses. Empty containers should not be used for other purposes and are to be handled as industrial waste according to local, state and federal regulations.
