Clover Lawn

Clover is an important part of having a green, low maintenance lawn that doesn't need a lot of water. Clover's deep roots help your lawn stay greener, longer during short-term drought conditions. Clover also self-fertilizes when you return the clover clippings to the lawn after mowing – meaning less work for you! Scott's Turf Builder® Clover Lawn is specially formulated with Strawberry Clover to establish fast and help your lawn thrive.

DIRECTIONS FOR USE

1 PREP

Set mower to lowest setting and cut entire lawn.

3 WATER

Water two times daily to keep the soil surface wet for the first two weeks.

2 APPLY

Use a Scott's® spreader to apply clover seed over existing lawn.

SELF-FERTILIZE

4 FEED

Once your clover is fully established, mow and return the clippings to your lawn for natural feeding.

SPREADER SETTINGS

SCOTT'S® HAND-HELD SPREADER

SETTING
2

Walk shoulder-width passes back and forth across lawn

SCOTT'S® BROADCAST/ROTARY SPREADER

SETTING

SCOTT'S® DROP SPREADER

SETTING
3 1/2

SCOTT'S® WIZZ® SPREADER

SETTING
3 1/4

WHAT TO EXPECT

Clover will begin to grow in 5-7 days. Resume mowing when lawn reaches desired mowing height.

FOR BEST RESULTS

Always use fresh product. After opening, plant within the season. Important: Store in a cool, dry place.

Scott's No-Quibble Money Back Guarantee™

If for any reason you, the consumer, are not satisfied after using this product, you are entitled to get your money back. Simply send us original evidence of purchase and we will mail you a refund check promptly.
