

1st Portable Solar Fridge Freezer

Feature:

Size:

LiONCooler is the first smart, app-controlled, rechargeable, solar fridge freezer. It keeps food and beverages ice-cold without ice and works like your home refrigerator, but on-the-go!

Cut the Cord - Go Mobile

No Ice-ever

Rechargeable & Replaceable

LiONCooler takes 4-6 hours to fully charge. The battery has a 10-hour life to keep the chill.

Smart Technology, App-Controlled

If temperature outside changes, you can adjust the cooler's temperature using the digital LCD display or remotely with the free Bluetooth App available for iOS or Android.

-4°F Freezing

LiONCooler chills to -4°F and is equipped with quality **LG compressors** to ensure performance.

Telescoping Handle & Large Wheels

- * This luggage-style design makes LiONCooler easy to move without having to lift.
- * The 6" durable wheels make transportation easy across all terrains.

3 Charging Modes

- * Use AC, 12-volt DC in the car, or solar panels. The battery only depletes when you use.
- * LiONCooler in portable mode. If you are connected to a power source, the battery will stay fully-charged.
