

*Preserva Wood® Renewer & Cleaner™* is a safe and effective product designed to clean and, in most cases, brighten weathered and dirty wood. Our *Renewer & Cleaner™* does not contain strong acids, corrosives, or bleach, so you and your wood will both be safe. For the best results, please review our instructions below before you begin your project.

#### PREPARATION

To assure maximum performance, proper surface preparation is essential. Sweep or brush excess debris from the surface to be cleaned. *CLEANER* works best when applied to damp wood. Test a small area and let dry to ensure satisfaction before you clean the entire project. Mask off any metal trim that might discolor when exposed to chemicals. Rinse all surrounding plants with water before and after using *CLEANER*.

#### DILUTION

Our *CLEANER* is supplied as a concentrate and must be diluted before use. Do not use full strength. Add 3 gallons of fresh water to one gallon of *CLEANER* to make 4 gallons of ready-to-use product. Excess material can be stored in a sealed plastic container.

#### SQUARE FEET COVERAGE

One gallon of diluted *CLEANER* will clean between 200 and 400 square feet of exterior wood, depending on its condition. Four gallons of diluted *CLEANER* should clean approximately 1,200 square feet.

#### APPLICATION

Spray, brush or roll diluted *CLEANER* onto wood surface to be cleaned. Allow *CLEANER* to soak into surface for 10-15 min. Use a soft bristle deck brush to work *CLEANER* into wood, working in the direction of the grain. Rinse well using a garden hose and pressure nozzle, or use a pressure washer on a low setting to prevent damage to wood. Do not apply below 40 degrees F.

#### FINAL STEP

Use fresh water to rinse plants, lawn, furniture, windows or any items that may have come in contact with cleaning solution. Allow wood to dry completely (24-48 hours) before applying a quality oil based finish such as *Preserva Wood®*.

*Note: Tough mildew stains must be treated with a bleach and water solution after the cleaning process is complete. Be sure to read and follow all warnings on the bleach container. Do not mix CLEANER with bleach. Clean all tools and equipment with clean, clear water.*

# NO

- Oxalic Acid
- Sodium Hydroxide
- Sodium Hypo chlorite (bleach)
- Potassium Hydroxide
- Sodium Metasilicate

**Cautions:** This product is safe and non-toxic for general health. Please follow good safety practices. Keep this and all cleaning products out of the reach of children. Avoid eye contact. Mild eye irritation after eye contact may occur associated with surfactant agent. If eye contact occurs, flush well with water. Use in well ventilated area. Individuals with sensitive skin should take appropriate precautions. Make sure to cover all surrounding plants and vegetation. Do not dispose of into or near storm drains, lakes, or streams.
