TOOLS TYPICALLY USED FOR INSTALLATION

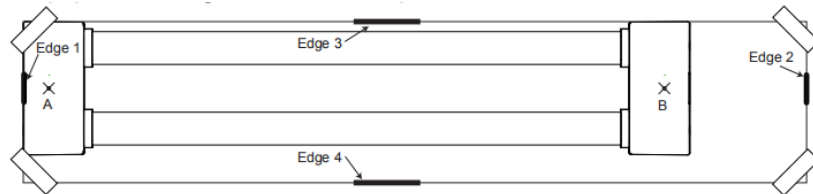

Installation

1. Remove the clear wrap on Light fixture before installation.
2. Choose your desired installation location.
3. On the Assistive Template provided, make two small holes at marks A and B (see below illustration).

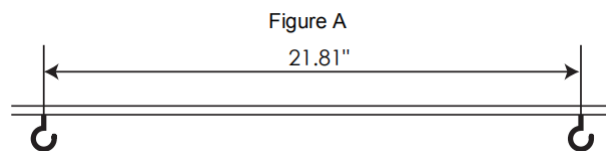

LED GROW LIGHT

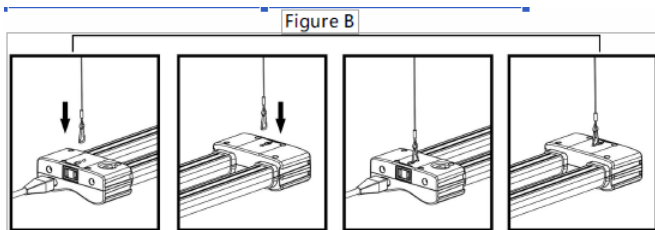

4. Tape Assistive Template to desired installation location (see below illustration; use this step if mounting directly to a hard surface vs using hooks and hanging cables).

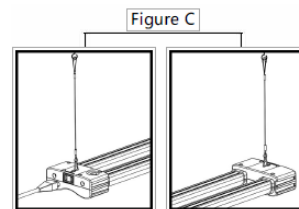

5. Drill two small holes at the marks A and B at your desired installation location (note distance between the holes).
6. Remove Assistive Template, then screw hooks into the holes at your desired installation location (Figure A).

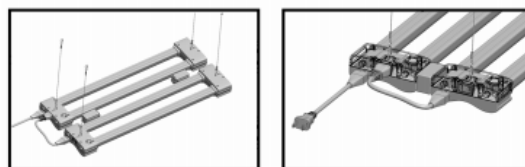

7. Hook the hanging cable to end-cap. (Figure B)

8. Hang cable to ceiling hook. (Figure C)

9. Slide small connection boxes from the space between two fixtures to end-cap. (Figure D below)

10. Plug in the products power cord to desired outlet or extension cord.
