ELECTRICAL REQUIREMENTS

Before you move your upright freezer into its final location, it is important to make sure you have the proper electrical connection:

- A standard electrical supply (115V, 60Hz, 10A), properly grounded in accordance with the National Electrical Code and local codes and ordinances, is required.
- It is recommended that a separate circuit, serving only your upright freezer, be provided. Use receptacles that cannot be turned off by a switch or pull chain.
- The fuse (or circuit breaker) size should be 10 amps.

Recommended grounding method

For your personal safety, this appliance must be grounded. It is equipped with a power supply cord having a 3-prong grounding plug. To minimize possible shock hazard, the cord must be plugged into a mating 3-pronged and grounding-type wall receptacle, grounded in accordance with the National Electrical Code and local codes and ordinances.

Voltage	115V
Frequency	60Hz
Input Power	75W
Refrigerant	R600a, 2.29g
Unit Temperature Range	-10° - 2°F
Operating Temperature Range	60 - 85°F
Rated Current	0.88A
Volume	2.1 cu. ft.
Weight	44 lbs.
Unit Dimensions	27" H x 17.25" W x 20" D
Control Type	Mechanical
Defrost Type	Manual
Lock	Yes
Cabinet Shelves (Total)	2

Technical Information
