EZ Mount™ backer plate makes installation quick & easy, true one-person installation

Steel-to-steel hinges for added strength and longevity

Naturally bacteria resistant, semi-permeable vinyl safety belt for superior hygiene

Large dual lockable built-in liner dispensers extends maintenance interval and prevents vandalism

Dual bag hooks easily accommodate thick diaper bags

Patent Pending

Contains no Triclosan or other added chemicals

Made in the USA

ULTRA® BEAUTY & DESIGN

- Upscale, subtle design fits any architectural environment and complements any décor
- Timeless and identifiable international logo
- Clean and sophisticated door sign matches any interior décor

ULTRA® STRENGTH & DURABILITY

- Strong steel-to-steel hinges fasten directly to wall for added strength and longevity
- Exclusive EZ Mount™ backer plate for unprecedented support
- Thick polyethylene build with a textured exterior surface helps prevent abrasion

ULTRA® QUICK & EASY INSTALLATION

- Exclusive Foundations® EZ Mount™ Backer Plate makes unit quick and efficient to install
- True one-person installation
- Includes all mounting hardware regardless of substrate being mounted to
- Safety belt can be easily removed and replaced if needed

ULTRA® HYGIENE & MAINTENANCE

- Naturally bacteria resistant polyethylene changing surface does not contain harmful anti-bacterial chemicals
- Easy-to-clean smooth interior limits areas for bacteria build-up
- Semi-permeable vinyl safety belt helps reject absorption of bacteria and is easy to clean
- Lockable liner cavities minimize refills and potential vandalism

ULTRA® COMFORT & EASE OF USE

- Extra-wide and deep changing surface more safely accommodates baby
- Gas spring mechanism ensures smooth open and close of the unit
- Dual liner cavities with smooth inserts for quick access
- Prominent, dual bag hooks easily accommodate thick diaper bag straps

ULTRA® COMPLIANCE & SAFETY

- Meets all global standards (ASTM and EN)
- Warning label in 24 languages and instruction sheets use pictures for global use
- ADA compliant when properly installed
- 5-year limited warranty

BACTERIA & MOLD RESISTANT

Foundations® brand commercial changing stations are made of inherently bacteria resistant polyethylene without the addition of antimicrobial chemicals. ASTM G21-15 testing confirms that the polyethylene surface does not provide a viable surface for fungal growth. Foundations believes all children's products should be as pure as possible. Therefore, Foundations does not add Triclosan or any other commercially available antimicrobial chemical to the surface of its baby changing stations.
