

PowerHeat™ Series

Heater Exhaust Fans PowerHeat™ Series

Heat your bathroom without turning on the heating system with a PowerHeat™ Series Fan

Expect more from a bathroom fan with the addition of a PowerHeat™ heater exhaust fan. You can now easily heat up your bathroom with its forced air system, while benefiting from adjustable color temperature lighting on some models. Control the lighting of your room by matching it to the current lighting or create the ambience you want with integrated dimmable LED lights (dimmer control not included).

PowerHeat™ heater exhaust fans keep your room looking modern with their low profile design, featuring brighter white cover color matched with the most common ceiling paint colors. Available in two sizes to meet the needs of small, medium and large bathrooms, PowerHeat™ fan line features a hanger bar system for quick and flexible installation for all types of construction. Unlike other solutions in today's market, these solutions can be installed in a 2x6 construction for enhanced versatility.
