

THANK YOU FOR PURCHASING THE FLEXIHOSE!

INSTRUCTIONS

- 1 Before using your FlexiHose make sure the rubber washer is firmly set inside the female coupling. This will prevent leaking.
- 2 Attach the female end of the FlexiHose to the water source.
- 3 Attach the supplied on/off valve to the male end of the FlexiHose.
- 4 The FlexiHose works fine without a spray nozzle. However, for best results, attach a spray nozzle, to the male threads of the on/off valve.
- 5 Turn the on/off valve to the OFF position.
- 6 Do not stretch or expand this hose when it is empty. Turn the water on at the source. Gradually increase the water pressure. The FlexiHose will automatically expand up to 3 times its original length.
- 7 When the FlexiHose is fully expanded, turn the on/off valve to the ON position and use the FlexiHose like any ordinary hose.
- 8 When the FlexiHose is not in use, make sure to turn the water OFF at the source spigot.
- 9 Turn the on/off valve to the ON position and allow the water in the FlexiHose to drain. If you are using a nozzle then open the nozzle. As the water begins to drain from the FlexiHose, it will automatically contract back.

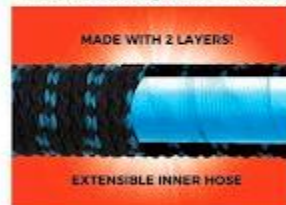

IMPORTANT INFORMATION

This expanding hose is intended for routine watering applications

- Do NOT leave the water turned ON with the FlexiHose under pressure when not in use. Always turn the water OFF and drain the water from the FlexiHose after each use so that your FlexiHose contracts back to a small size.
- The outer webbing protects the inner expandable hose. Therefore, take care that the outer webbing is not cut, torn or punctured.
- Do not run hot water through this hose.
- Drain your hose in the summer when you are not using it and keep it shaded as much as possible.
- Protect your FlexiHose from harsh winter weather by storing it indoors. Be sure to drain the hose completely before storage as water remaining in the hose can freeze, damaging the hose.

Revolutionary 2-in-1 Hose

Unique 2-in-1 design features a tough rubber inner hose covered in durable, super-strong webbing.

Durable & Reliable

Stays strong in all types of weather

Kink-Free Design

Our FlexiHose will never twist, tangle or kink!

ATTENTION! WATER PRESSURE MUST BE IN THE RANGE 40-145PSI
