for E-Z carry

Rigid bottom  
and sides

See through  
window

### CARE:

- Do not overstuff, do not pack above fill line.
- Use damp cloth to remove any dirt from outside of tote.

### PRECAUTIONS:

1. Keep out of the reach of children.
2. Do not puncture bag.
3. Do not use to store food, leather or items made of fur.
4. Down filled item should only be reduced to 50% as further compression can hurt down.
5. Do not store bag near sharp objects, heat sources such as on top shelves of closets near light bulbs or in temperatures above 130°F (54.4°C).
6. If you have any questions about the possible effects of vacuum storage on specific items, consult the manufacturer of that item.

## INSTRUCTIONS:

1. Unzip outer case and open inner attached bag. Flatten rigid bottom and pull up sides.

2. Make sure all items are completely dry before packing. Pack your items flat, stacking them towards the top of bag. Do not pack above fill line.

3. Seal the bag slowly by sliding the tab from one side to another. Our unique double locking system ensures the bag is securely sealed. Remove cap from valve.

4. Vacuum out air and use standard vacuum cleaner hose. Remove the cap from the valve, place the vacuum hose over the valve and turn it on. Replace the cap when sufficient amount of air has been removed. If bag re-inflates repeat steps 3 and 4 before you put cap on.

5. Fasten inside straps across bag.

6. Zip the tote and store anywhere: closet, under bed, garage, attic, basement.

### QUALITY GUARANTEE:

Space Bag® Vacuum Seal Storage Tote will be completely free of manufacturing defects for a full year from date of purchase or we'll replace it. Manufacturer assumes no liability for damage to items stored in Space Bag® storage tote. The user is responsible for determining the potential effect of vacuum storage on any item and the proper use of this product.
