|---|---|
| x8 | x4 |

| Tall pole | Short pole |
|---|---|
| x16 | x16 |

**Interlocking Tees**
x8

**Shelves**
x5

## ASSEMBLY INSTRUCTIONS

**STEP 1**
Flip the first shelf over, then assemble four threaded feet with foot collars and insert into the bottom shelf.

Bottom of shelf

Top of shelf

**STEP 2**
Flip the shelf over, so feet are touching the ground.

**STEP 3**
Insert tapered end of pole into top of shelf. Use either 4 short or 4 tall poles based on desired shelf height.

Short: 9 inches between shelves
Tall: 15.4 inches between shelves.

**STEP 4**
Line up the next shelf with the inserted poles and press firmly down until fully engaged. Repeat steps 3 & 4 to get to desired shelf height.

**STEP 5**
Insert top caps fully into place on the top shelf.

**STEP 6**
Move shelf into final location. Twist foot collars up or down to level shelf, if necessary.

**STEP 7**
Secure wall brackets around poles under the desired top shelf. Secure wall brackets into stud or using wall anchors.

**\*Warning\*** Wall Brackets must be used for full shelf weight capacity.

Wall

**CUSTOMIZE SHELF HEIGHTS**
Short and tall pole sizes create over 75 different configurations. Always be sure to use the same pole size to build each shelf section.

Use interlocking tees to connect shelves together.
