#### INSTALLATION

Screw the swivel arm bracket onto the outlet shower arm. Screw the vacuum breaker onto the threaded connection on the swivel arm bracket. Install rubber washers in the ends of the hose. Turning in a clockwise direction, thread the hose swivel onto the threaded end of the vacuum breaker and the other hose end onto the hand held shower. Hand tighten firmly all connections. Turn the water supply on and check for leaks.

#### OPERATION

To adjust the spray pattern of the shower head, simply rotate the outer ring to the desired spray (Full-Body, Dual action or Massage).

#### MAINTENANCE

The gleaming finish of your SPEAKMAN® hand shower can be cleaned by using mild soap and warm water. Dry immediately with a soft, clean cloth for best results. The flow control device limits water flow to 2.5 gallons per minute. The small orifices may become clogged with scale and other minerals found in potable water. To clean the flow regulator, simply remove the shower arm mount from the bent arm, pull out the rubber washer from the ball, dislodge the flow regulator and clean as necessary.
