

LADDER LOCKDOWN

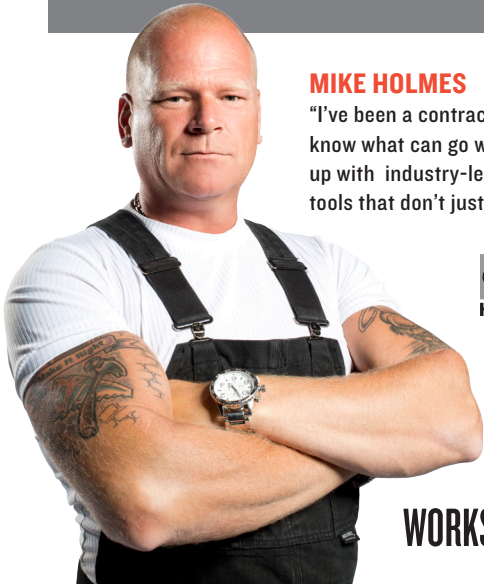

THE ULTIMATE LADDER SAFETY DEVICE

Made of 14 gauge cold rolled steel and hand welded for supreme strength and durability, Ladder Lockdown is designed specifically to reduce lateral movement and prevent ladder kick-out.

Ladders are the most dangerous tool in the world. Climbing a ladder is 25 times safer when used with a Ladder Lockdown saddle and safe laddering practices.

An independent study conducted by Applied Building Sciences, Inc.

25x SAFER!

MIKE HOLMES

"I've been a contractor for over 30 years and I know what can go wrong. That's why I've teamed up with industry-leading manufacturers who make tools that don't just look good, but are good".

Mike Holmes

WORKS ON CONCRETE, WOOD, TILE, MARBLE, GRASS, DIRT, VINYL DECKING, ICE AND SNOW.

LADDER FALL STATS (USA):

420 DEATHS FROM LADDER FALLS EACH YEAR

54% OF LADDER FALLS RESULT FROM LADDER MOVEMENT.

- Liberty Mutual Research Institute for Safety Volume 15 number 3 Winter 2012

100% OF ALL LADDER ACCIDENTS COULD BE PREVENTED IF PROPER ATTENTION TO EQUIPMENT AND CLIMBER TRAINING WERE PROVIDED ACCORDING TO OSHA.

- (<http://www.idahoagc.org>)

250,000+ VISITS TO THE E.R. EACH YEAR FROM LADDER FALLS

- Neiss 2015

THE LLD SYSTEM

1. Proprietary staple system for soft ground
2. Proprietary non-slip grip rubber for solid surfaces
3. Proprietary saddle design
4. Cam buckle strap
5. Frozen ground spikes
