Problem	Possible Cause	Solutions
The display shows:  	Drawer is not closed properly	Close the drawer and press START/PAUSE button to start the cycle. If the drawer is closed and the drawer lock error message is displayed, call for service
The display shows: 	Lid is not closed properly	Open the drawer and make sure the latch area is free of clothing or other obstructions. Close the lid, shut the drawer, and press START/PAUSE to start the cycle. If the lid is closed and the lid error message is displayed, call for service
Washer fills with water slowly or not at all, or the display shows: 	Water supply faucets are not fully open. Water line hoses are kinked, pinched, or crushed. Water inlet filters are clogged. Water supply pressure to faucet or house is too low. Water supply connected with leak-limiting hoses.	Make sure that the water faucets are fully open. Make sure that the hoses are not kinked or pinched. Be careful when moving the washer during cleaning and maintenance. Clean the inlet filters. See Maintenance in the Care and Cleaning section. Check another faucet in the house to make sure that household water pressure is adequate and flow is not restricted. Disconnect the inlet hose from the washer and run a few gallons of water through the hose to flush the water supply lines. If flow is too low, contact a plumber to have the water lines repaired. Hoses designed to limit leaks can trip falsely and prevent the washer from filling. The use of leak limiting hoses is not recommended.
Washer will not turn on	Power cord is not properly plugged in. House fuse is blown, circuit breaker has tripped, or power outage has occurred.	Make sure that the plug is plugged seruely into a grounded, 3-prong, 120-VAC, 60-Hz. outlet. Reset circuit breaker or replace fuse. Do not increase fuse capacity. If the problem is a circuit overload, have it corrected by a qualified electrician.
Water in the washer drains slowly or not at all, or the display shows: 	Drain hose is kinked, pinched, or clogged Drain discharge is more than 53 " (134.6 cm) above bottom of washer.	Make sure the drain hose is free of clogs, kinks, etc., and is not pinched behind or under the washer. Adjust or repair drain. Maximum drain height is 53 " (134.6 cm).
Washer chimes repeatedly before final rinse	This is not an error. This is an alert to allow the addition of liquid fabric softener before the final rinse..	See Using Fabric Softener, page 16, for instructions on adding liquid fabric softener to the load. To disable or enable the fabric softener alert, press and hold Warm Water and Extra Rinse at the same time for three seconds.

The display shows: 	If the rebalancing operation (see above) is not successful, this error will be displayed. The load is too small. Heavy articles are mixed with lighter items. The load is out of balance.	The automatic attempt to rebalance the load was not successful. The cycle has been paused to allow the load to be manually adjusted. Small loads may need additional items to be added to allow the washer to balance the loads. The load may have heavy items loaded with lighter items. Always try to wash articles of somewhat similar weight to allow the washer to evenly distribute the weight of the load for spinning. Manually redistribute the load if articles have become tangled preventing the automatic distribution from working properly.
The display shows: 	Control error.	Unplug the power cord and contact your nearest LG service center.
The display shows : 	Water level is too high due to a faulty water valve.	Close the water faucets, unplug the washer, and call for service.
The display shows: 	The water level sensor is not working correctly.	Close the water faucets, unplug the washer, and call for service.
The display shows: 	A motor error has occurred.	Allow the washer to stand for 30 minutes and then restart the cycle. If the LE error code persists, call for service.
The display shows: 	It is time to run the Tub Clean cycle.	Empty the tub, add a diluted solution of 1/4 cup bleach to 1 qt. water to the tub, and select the Tub Clean cycle. To skip the Tub Clean cycle when alerted, press the cycle selector buttons. The message continues to appear for a few more wash cycles and then disappears until the next scheduled tub clean.
The display shows: 	Pedestal washer is being operated without a full-size washer. Stacking switch is not working properly.	The pedestal washer will not operate as a standalone unit. It must be stacked under a full-size LG appliance. The stacking switch will not operate properly if the unit is stacked under a non-LG appliance, or an LG appliance manufactured before 2009.
