WHOWEARE We are the makers of the Original Wood Pellet Patio Heater. Our commitment to great craftsmanship, innovation of gravity fed technologies, and manufacturing entirely in the USA are what drives us forward. Most simply, we want to bring people together and a warm fire is how we do it. Innovation is the heart of the business. We are always looking for ways to improve our products and bring new concepts to life! Follow our journey @Timberstoves. THE ORIGINAL WOOD PELLET PATIO HEATER

Our goal is to bring family and friends together, our method is a roaring wood fire. Timber Heaters bring the age old tradition to the 21st Century with a pellet fired, gravity fed system that requires no electricity. Feel the heat from head to toe, enjoy the flame without the smoke. Our heaters create a clean burning fire that can be enjoyed for hours. This is the future of backyard fires.

LILTIMBER

72,000 BTU Stainless Steel Outdoor Heater

- 10 Ft Heating Radius
- 12 Lb Hopper Capacity
- 1.5 Hr Burn Time
- 8 x 5" Windows
- Wt. 72 Lbs
- Dim. 11 x 20 x 84"

BIGTIMBER

90,000 BTU Stainless Steel Outdoor Heater

- 12 Ft Max Heating Radius
- 25 Lb Hopper Capacity
- 2.5 Hr Burn Time
- 12 x 5" Windows
- Wt. 82 Lbs
- Dim. 11 x 20 x 84"

PELLET FIRED ♦ NO POWER ♦ NO SMOKE ♦ SAFE ENCLOSED FLAME ♦ MADE IN THE USA

SAFETY CAGE

SAFETY MESH

Specially designed to prevent injury while allowing heat to freely radiate outdwards.

STAINLESS STEEL

A modern look that built to withstand the elements in any climate.

The New Elite series brings performance and style into one great product, providing radiant heat while keeping the stove safe for family and friends.

TIMBER GRIDDLE

From Breakfast to Dinner, Cook all your Favorite Meals on the Timber Griddle

TIMBER OVEN

Bake, Braise, Fry & Sear your way to a delicious meal in the Timber Oven

The New Burn Box accepts both the Pizza Oven & Griddle

- Wood Pellet Fired
- Perfect for Outdoor Kitchens or Camping/Tailgating
 - No Power & No Moving Parts
 - Provides 1.5 Hrs of Cook Time

Cooktops Easily Pop On Big & Lil' Timber Heaters

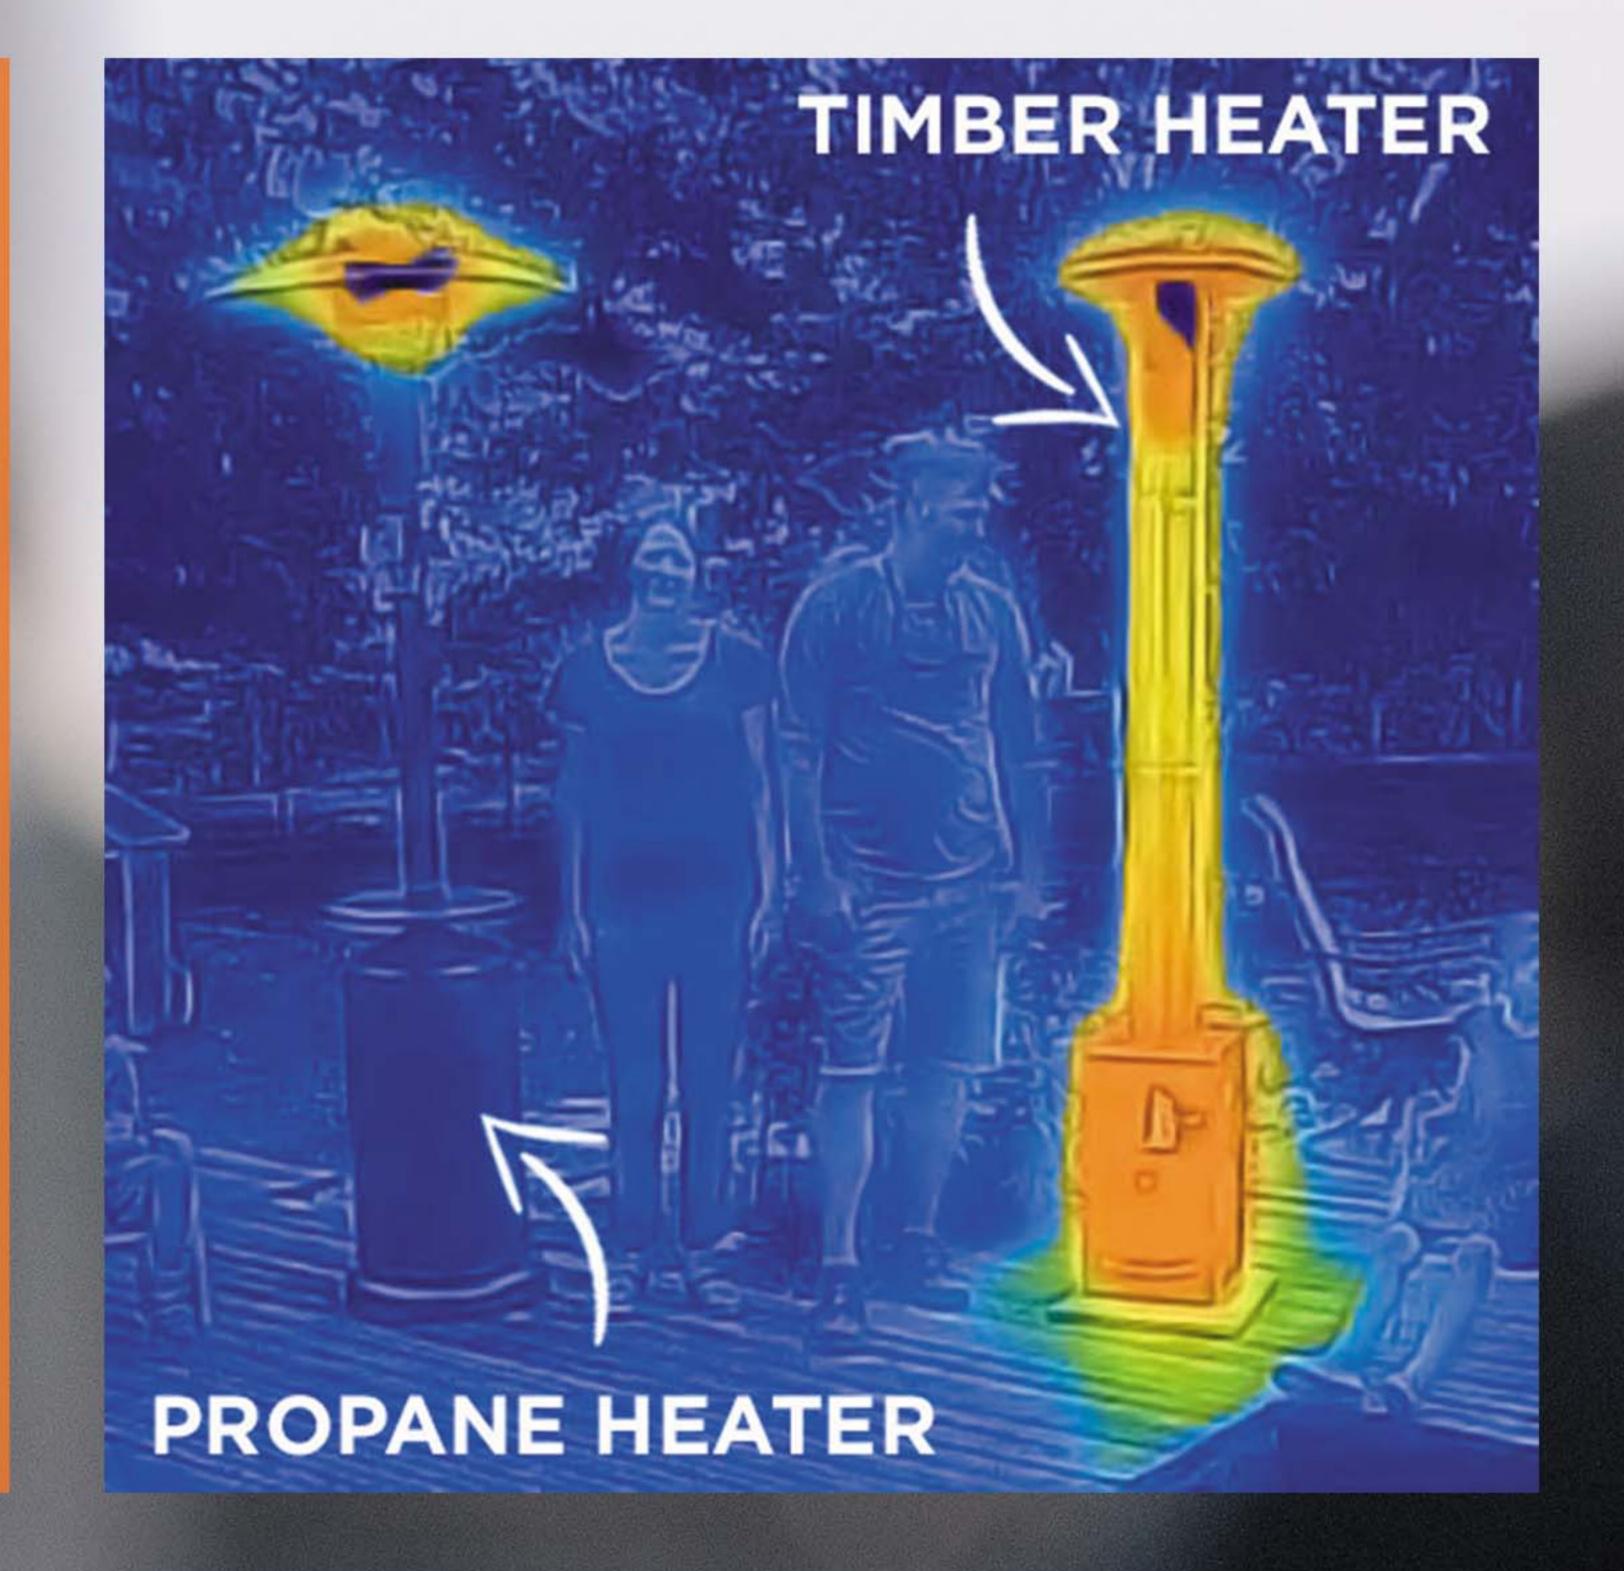

FEELFIEL

THERMAL IMAGING

Take a look at the thermal image to the right and it becomes clear the competition just can't compete. Timber Stoves Produce radiant heat from the head to toe. With a max heating radius of up to 12 feet away, it's easy to keep the whole family warm.

Compared to propane our wood pellet patio heater produces twice the amount of BTU's while operating at half the cost. Timber Stoves burn so efficiently that they produce little to no visible smoke.

HOWIT WORKS

The engineering behind Timber Heaters create a pellet heating system that requires no electricity and has no moving parts. The elimination of the auger and the blower fan, key components in ordinary pellet stoves, allows our Stoves to be portable and free from hardware failure.

IT ALL STARTS WITH THE FUEL

Wood pellets are an extremely efficient biomass fuel that create radiant dry heat. As a by-product of the saw mill industry that would otherwise be waste, pellets are very economical, costing roughly \$5 for a 40 Lb bag.

THE GRAVITY FEED SYSTEM

Wood pellets are poured into the hopper located at the back of the stove. The fuel is funneled into the firebox, covering the fire pot. A log jam effect is created, only allowing a certain amount of fuel in the fire box. The pellets are manually lit with fire gel or charcoal lighting fluid. As the pellets burn, they reduce in size and turn into ash, allowing new fuel to come in. This Enables the stove to burn continuously for hours.

THE DRAFT SYSTEM

Without vertical stove pipe and a sealed firebox, Timber stoves would not work. Wood pellets need to have forced air in order to burn completely and efficiently. As hot air rises up and is pushed through the stove pipe, its velocity increases due to constriction. This creates a vacuum inside the firebox, pulling air from slots on the bottom of the stove up through the firepot.

MUST HAVE ACCESSORIES

Stainless Firepot

12 lb Hopper Extension

Locking Casters

Round Heat Pad

Weight Plate

Waterproof Cover

Timber Oven

Timber Griddle

Fire Gel

TIMBER STOVES
FEEL THE HEAT
