ELEMENTI

THE ART OF LIVING

Care & Maintenance

Frame Care (Powder-Coated Aluminum)

Regular Cleaning
Wipe down the frame occasionally with a solution of mild soap and warm water using a soft cloth. Avoid abrasive brushes or harsh chemicals. After cleaning, rinse thoroughly and dry completely to prevent water spots or streaks .

Salt & Chlorine Removal
If your chair is near the coast or pool, clean regularly to remove salt or chlorine buildup, which can cause oxidation or blistering—these damages are not covered by warranty

Winter Protection
Before freezing weather, ensure all moisture is removed from frames and joints. Store indoors or cover with a breathable, properly sized outdoor furniture cover

Restore Finish
Periodically use automotive-grade or outdoor furniture wax to restore UV protection and sheen on the aluminum

---

Cushion Care (Sunbrella® Fabric)

Routine Cleaning
Wipe up light spills with a clean, dry cloth to prevent staining

Deep Stain Cleaning
For tougher stains, refer to the care guidelines from Sunbrella's official website: typically mild soap and water, occasionally with diluted bleach (1 part bleach to 10 parts water), snapped dry in shade

Drying is Crucial
If cushions get soaked, stand them on edge to enable full drainage, and only store or cover them when fully dry

Cover & Store in Off-Season
When not in use—especially in bad weather—cover cushions properly or store them indoors. This extends their lifespan and maintains warranty coverage

---

Teak Care
Regularly clean it with a soft brush or cloth and soapy water, and consider applying a teak sealer or protector once or twice a year to provide continuous protection. For deeper cleaning, use a teak cleaner or a diluted vinegar solution, always scrubbing with the grain. Ensure that furniture is dry before covering it to prevent mold and mildew growth. While teak is naturally weather-resistant, prolonged

exposure to direct sunlight can cause it to fade. Consider using covers or placing the furniture in a shaded area to slow down the fading process.

Moving Parts & Hardware

Check Bolts & Swivels - Periodically inspect any bolts, screws, or swivel mechanisms. Tighten as needed and exercise moving parts to prevent stiffness. Inspect leg glides (plastic or rubber feet) occasionally. Replace worn or missing ones to protect your patio and maintain stability.
