Buxus (Boxwood)

Compact shrub known for its dense foliage. Tough & easy to grow, boxwood is known to keep its evergreen color throughout the winter.

Hardiness Zones - USDA Hardiness 5-9

Sun Exposure/Watering

Light Requirements: Full Sun/Part Sun is optimal for growing

Soil: Well-drained soil

Water: When soil is dry

Growing Tips

Prepare a layer of 2-3 inches of mulch after planting boxwood to help keep moisture longer. Boxwood is very easy to care and low maintenance. Soil pH should be between 6.5 to 7.

Caring for Buxus

Remember not to disturb after planting, they have shallow roots. Protect from strong winds & full winter sun. Use a good fertilizer for acidic shrubs.

Pests & Problems of Buxus

Relatively undisturbed by deer & rabbits. But can attract scale or spider mites & develop leaf blight.

Uses

Foundation, Beds, Formal Gardens, Hedges, Containers
