

Use and Care of Jamesdar Products

Use a clean soft cloth that will not scratch the surface when dusting.

For plastic and metal items, use a slightly dampened (not wet) soft cloth to clean when needed. Do not use household or abrasive cleaners. These may damage the surface.

Do not strike or slam any surfaces and avoid sharp or rough object across the surface of the furniture.

Never pull the legs when moving an item. Lift by the main body.

Use trivets when serving food and avoid placing hot pots on the surfaces.

Upholstery should vacuum with an upholstery attachment regularly to remove dust and dirt.

Thank you for your attention,
Jamesdar Product Compliance Team
