

FLOWER CARE & HANDLING

PREPARE THE VASE

Fill a vase with fresh water and add the provided flower food.

TRIM THE STEMS

Cut 1 inch off stems at a diagonal using clean scissors

REMOVE EXTRA LEAVES

Strip any leaves that will sit below water line to reduce bacteria

REFRESH REGULARLY

Change water and recut stems every 2-9 days for longer vase life

KEEP COOL

Place flowers in a cool area, away from direct sunlight and heat
