

# Delta Shower Door Measurement Guide

Before you customize your dream door, you need to make sure you have the correct measurements.

• **Identify Vertical and Horizontal Openings**

Height (A) and Widths (B). Widths (B) measurements are often not the same so doors can be adjusted up to 3/8".

• **Vertical Opening**

Measure from the top of the tub apron or the top of the threshold up to the top of the acrylic (or tile) surround wall.

• **Horizontal Opening**

Measure width of opening at the top and the bottom of the enclosure.

• **48" Shower**

- Opening Requirement for Installation: fits doors with opening between 43-3/8" minimum – 47-3/8" maximum
- Finished Door Height: 71"
- Minimum Required Clearance Height for Installation: 73"
- Sill/Threshold Depth Requirement for Installation: 2-7/8"

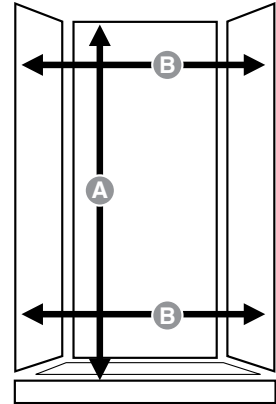

• **60" Shower**

- Opening Requirement: fits doors with opening between 55-3/8" minimum – 59-3/8" maximum
- Finished Door Height: 71"
- Minimum Required Clearance Height for Installation: 73"
- Sill/Threshold Depth Requirement for Installation: 2-7/8"

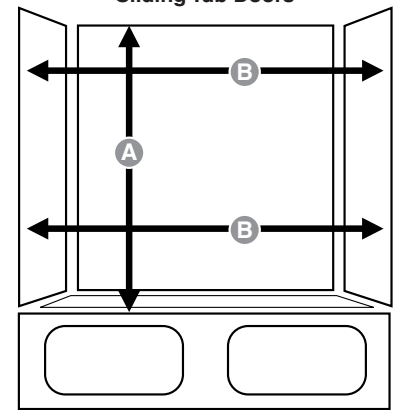

• **60" Tub**

- Opening Requirement: fits doors with opening between 55-3/8" minimum – 59-3/8" maximum
- Finished Door Height: 59"
- Minimum Required Clearance Height for Installation: 61"
- Sill/Threshold Depth Requirement for Installation: 2-7/8"

Sliding Shower Doors

Sliding Tub Doors

NOTE: the height will be different for shower doors vs. bathtubs.

## RECORD DIMENSIONS BELOW

	Opening
Height (A):	
Width of widest point (B):	
Width at narrowest point (B):	

**\*\*Disclaimers**

- For ceramic tile application, use the top of the tile for the maximum door height.
- In older homes the opening at the top is often wider than the bottom due to an out-of-plumb condition.
- NOTE: All Delta Shower Doors are designed to accommodate out-of-plumb conditions totaling 3/8".
