

## INSTALLATION TIPS VINYL MOULDING & TRIM

### Sawing/Cutting:

- Use standard woodworking equipment for most applications
- If using a power miter saw, a carbide-toothed blade with 80 teeth or more is recommended

### Nailing:

- Use 6d and 8d galvanized nails
- Place nails 12" on center, approximately 3/4" from each edge
- Pre-drilling is required at temperatures of 40° F or below
- Veranda moulding can also be installed using a pneumatic nailer, with stainless steel or painted head screws or with construction grade adhesives

### Gluing:

- To reduce or eliminate open joints, pipe glue or PVC pipe cement is recommended
- Temperature variations will cause PVC moulding to expand and contract

### Painting:

- Veranda moulding with factory-applied Readi-Finish® requires no painting
- Oil based or latex paints can be used to achieve custom finishes
- For darker custom colors (colors that fall within the lightness (L) value of 56 to 0, with 100 being white and 0 being black), the use of heat-reflective paint is recommended

### Cleaning:

- Veranda moulding can be cleaned using any of the recommended household cleaners listed below; however, glass cleaner has been shown to be best at keeping the finish intact
- Recommended cleaners: Windex, 409 Glass and Surface Cleaner, Spic & Span Cinch, Fantastik All Purpose, etc.
- Apply the cleaning solution and immediately wipe dry for best results
- Avoid harsh cleaners with glycol ethers, ethanol type solvents and/or isopropyl alcohol as they can soften the PVC finish if left on for several minutes

## BASIC & DECORATIVE SOLUTIONS VINYL MOULDING & TRIM

- Lifetime No Rot® material constructed from 100% Cellular Vinyl PVC®
- Moisture and termite proof
- Low maintenance, easy to clean
- Prefinished, no painting required
- 10 year factory finish warranty
