

## Care Instructions for Stair Tread Moldings

### Regular Cleaning:

Sweep or dry mop your Stair Tread moldings daily to remove dirt and debris. For deeper cleaning, use a damp mop with a mild cleaning solution such as a mixture of water and a few drops of dish soap or a pH-neutral vinyl cleaner.

Avoid excessive water as it can seep into the seams, potentially causing damage. Do not use abrasive tools like steel wool or stiff-bristle brushes that can scratch the surface.

### Heavy Object Precaution:

When moving heavy objects up or down the stairs, take care not to bump or drag them along the edges of the moldings. Although our moldings are highly durable, strong impacts can cause damage to the product.

### Avoid Direct Sunlight and Heat Exposure:

This molding is highly sensitive to heat. Prolonged exposure to direct sunlight can cause warping or discoloration of the vinyl material. Additionally, leaving the product under direct sunlight, even while still in its original packaging, may cause deformities. It's essential to store the product in a cool, shaded area to prevent heat damage.

### Indoor-Only Use:

While this product is 100% waterproof, it is strictly intended for indoor use. Under no circumstances should it be installed on outdoor staircases, as it is not designed to withstand exterior conditions.

By following these simple care instructions, you can ensure the long-lasting performance and appearance of your Stair Tread moldings.
