'Parts List'

Lid

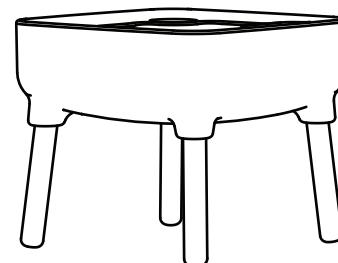

Working Tray

Working Tray

Debris Screen

Base

'Assembly'

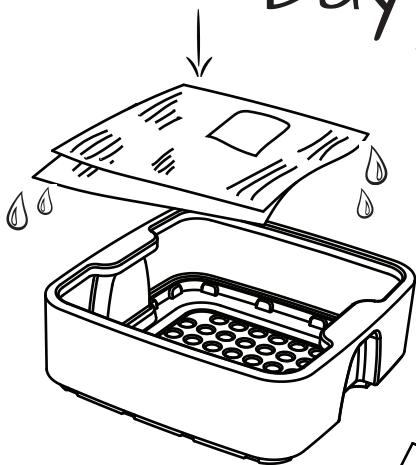

a. insert legs into corners

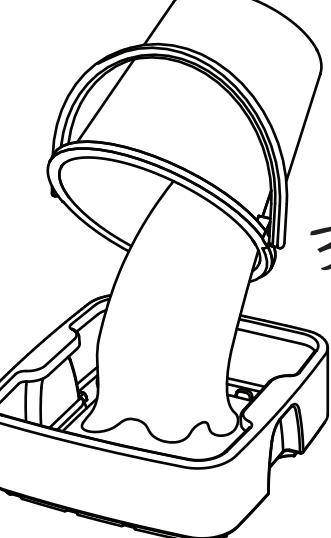

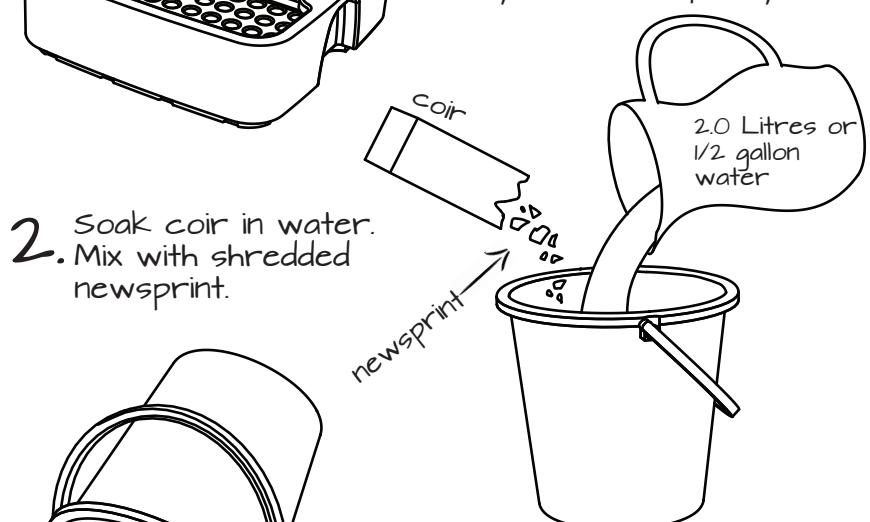

b. screw on 'drain valve' into the bottom of base

c. install 'debris screen' into recessed area over 'drain valve'

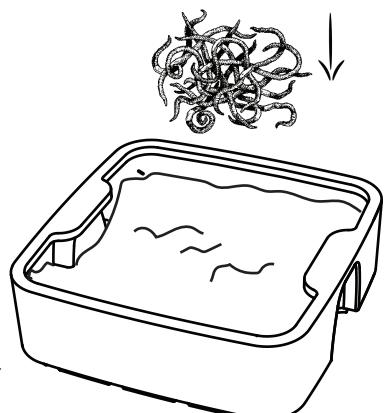

'Day One'

1. Set working tray on base, soak 2 sheets of newsprint in water, lay in bottom of tray. (initial setup only)

3. Spread mixture lightly and evenly over the tray bottom.

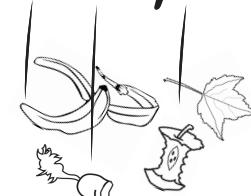

4. Add approx. 1/2 kilo or one pound of worms.

5. Set the upper tray and lid on top and let the worms get accustomed to their new home.

NOTE: always store your farm in a cool dark location.

'Day Two'

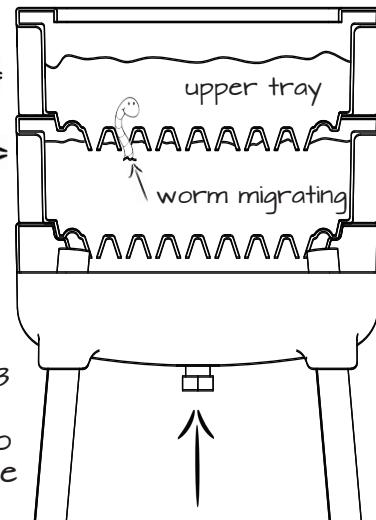

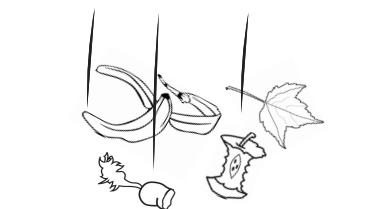

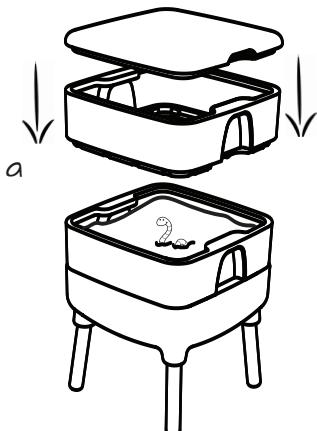

repeat step 2 & 3 →

make sure holes in contact with soil below →

7. After several weeks the worms have done their work, and it's time to fill the 'upper tray'.

repeat previous steps 2 & 3 then add 'food'.

Your worms will migrate into the upper tray and start the process over (replace lid)

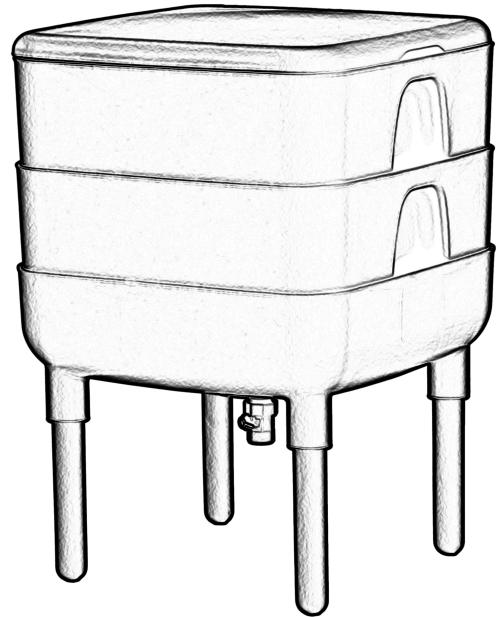

drain off excess moisture here ↑

'Lista de Partes'

Tapa

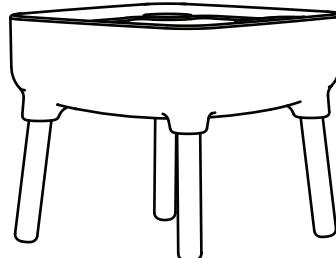

Bandeja de Trabajo

Bandeja de Trabajo

Filtro de impurezas

Base

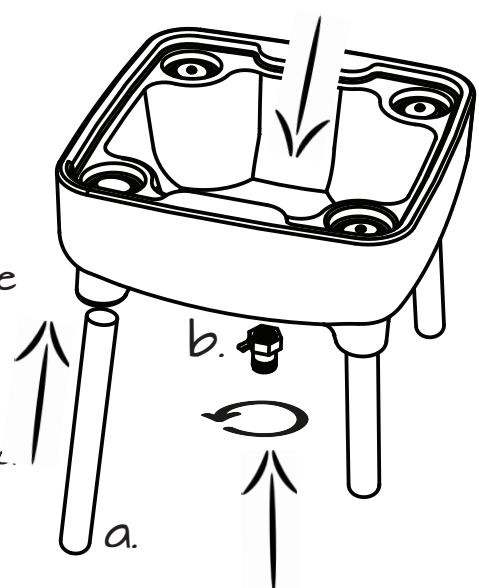

c.

'Montaje'

a. Insertar las patas de madera en las esquinas de la base

b. enroscar la 'válvula de drenaje' en el fondo de la base

c. instalar el 'filtro de impurezas' en el área encastada sobre la 'válvula de drenaje'

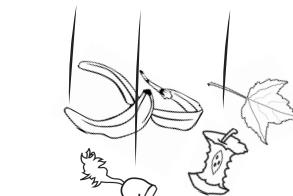

'Día Uno'

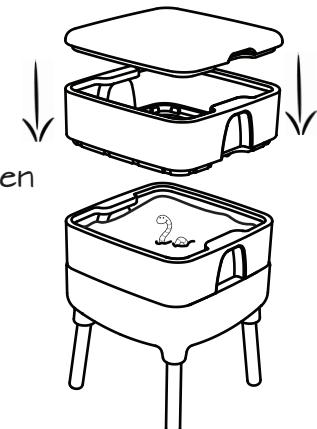

NOTA: Guarda siempre tu granja en un lugar fresco y oscuro

'Día Dos'

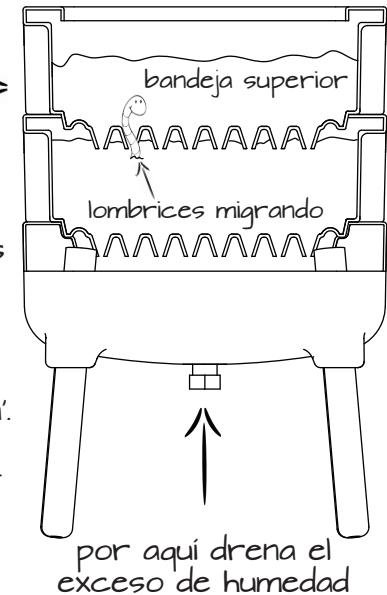

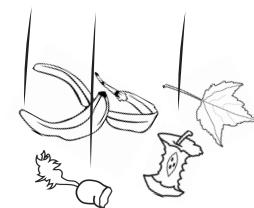

repite los pasos 2 y 3 →
asegúrate de que los orificios están en contacto con la tierra de abajo →

7. Luego de varias semanas, las lombrices habrán hecho su trabajo, y será tiempo de llenar la bandeja superior. Repite los anteriores pasos 2 y 3 y luego agrega 'comida'. Tus lombrices migrarán a la bandeja superior y comenzarán otra vez el proceso (reemplaza la tapa)

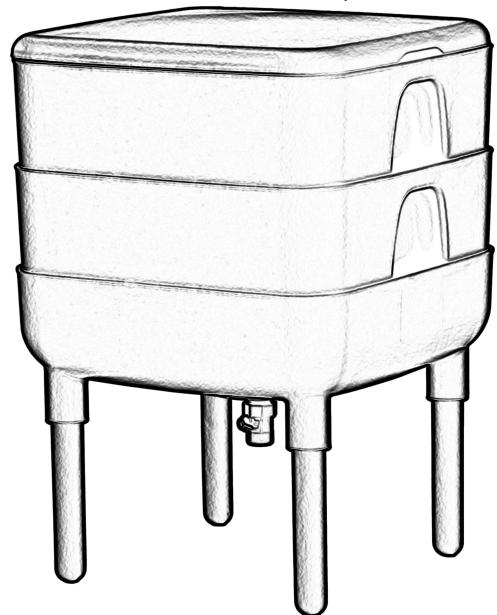

6. 'Día de Comida'. Comienza a alimentar tus lombrices (ver en página 1 la lista de comida adecuada para las lombrices).

Le 'composteur vivant'

par FCMP Outdoor
