

CARE & CLEANING

Before using, wipe up the wicker/rattan with a clean, wet cloth/towel.

Keep your furniture covered

Both in and out of season, we suggest that you keep your furniture covered when not in use. You can also reduce exposure to direct sunlight by storing your furniture in a covered area. This will minimize fading and can double the life of your furniture.

Cushion covers are made with water-resistant coating, but they can't stand heavy rain or much pouring water/ other liquid staying on it for long time. So please keep cushions inside for rainy days and quickly dry the cover surface once there is water/liquid on it.

Use mild cleanser and water for normal cleaning. Do not use bleach or other solvents.

For cushion covers, we do not recommend for frequent washing, because frequent washing will damage the UV protection coating of the cover. Hand-wash with mild cleanser is firstly recommended in order to protect the coating.

Use a soft, clean cloth or towel to wipe up glass table top
