# M.O.B. VAC

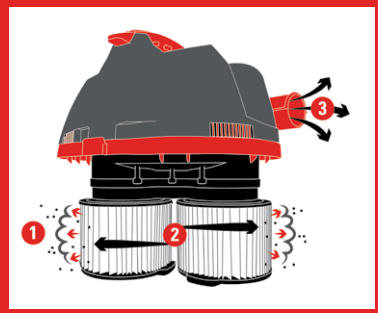

**1650RV**  
MOTOR ON BOTTOM

**THE MOST POWERFUL  
RIDGID® VAC EVER**  
24% *greater* than  
our previous best.

- **STABLE**  
Low center of gravity provides stability.
- **EASY TO EMPTY**  
Filter stays in drum when emptying, allowing for easier, cleaner debris disposal. Drum detaches from the power sled/cart with quick-slide lock lever.
- **HANDS-FREE**  
Foot-activated power switch allows for easy access and hands-free operation.

# RV3410 SMART PULSE™ VAC

- 1 Airstream puffs into filter.**
- 2 Filters alternate pulsing**
- 3 Vacuum stream continues uninterrupted.**

The Smart Pulse™ vac is designed with two filters and an integrated sensor. The sensor is continuously monitoring suction efficiency. When a pressure difference inside the vac vs. the outside of the filter is recognized by the sensor, the vac begins an alternating pulsing cycle, back-flushing air through the filter. This process cleans the filter automatically, yet only when needed, providing uninterrupted performance and maximizing efficiency.
